

Nithyasri Kattela

Newark, NJ | +9737188089 | kattelanithyasri9248@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Dynamic Full Stack Developer with 2+ years of experience crafting scalable microservices and RESTful APIs with Java, Spring Boot, and Angular, driving high-impact customer solutions.
- Expert in AWS, Kubernetes, and Docker, optimizing CI/CD pipelines for 99.9% uptime in enterprise systems with OAuth 2.0 security.

EDUCATION

New Jersey Institute of Technology

Newark, NJ

Master of Science - Computer Science, GPA: 3.7

Aug 2022 - May 2024

Sri Indu College of Engineering and Technology

Hyderabad, India

Bachelor of Technology with Honors - Computer Science; GPA: 8.2

Jun 2018 - May 2022

SKILLS

Programming: Java, Java EE, Bash, MySQL, MongoDB, PostgreSQL, MSSQL, DynamoDB

Software: HTML/CSS, Node, React, Django, Angular, GraphQL, AWS, Docker, Kubernetes, Gitlab CI/CD, Linux, REST

Frameworks: Spring Boot, Spring MVC, Angular (12/13), React, Thymeleaf, Bootstrap

Functional: ESTful API Development, Data Ingestion & Processing, Role-Based Access Control (RBAC), Data Transformation & Enrichment, CI/CD Pipeline Implementation, Performance Tuning & Debugging, Agile/Scrum Methodology, Documentation & Collaboration, Agile

PROFESSIONAL EXPERIENCE

Morgan Stanley | Software Engineer

Aug 2024 - Present

- Architected and deployed a high-performance Single-Page Application (SPA) using Angular 12+, RxJS, and NgRx for state management, with a Java Spring Boot 2.7+ backend leveraging Spring Security and Spring WebFlux for reactive APIs.
- Engineered OAuth 2.0/OIDC-based authentication flows using Keycloak/PingFederate, integrating with Kerberos-based legacy systems for seamless SSO across hybrid environments.
- Designed and implemented Backend-for-Frontend (BFF) microservices using Spring Cloud Gateway with JWT validation, reducing client-side complexity and improving API response times by 40%.
- Containerized services using Docker and deployed on OpenShift/Kubernetes clusters with Helm charts, achieving zero-downtime deployments via blue-green strategies.
- Implemented event-driven architecture using Kafka for real-time order email notifications, achieving 99.99% SLA for financial transaction alerts.
- Automated CI/CD pipelines with Jenkins/GitLab CI, incorporating SonarQube static analysis and OWASP ZAP security scanning into the SDLC.
- Optimized Oracle DB queries using Spring Data JPA with Hibernate second-level caching, reducing report generation times from 15s to 2s for high-volume accounts.

Quadrant Resource LLC | Software Engineer

Sep 2023 - May 2024

- Developed high-performance RESTful APIs with Spring Boot, integrating MySQL for 20% faster inventory analytics.
- Designed responsive Thymeleaf/Bootstrap UIs, enhancing reporting accuracy and user satisfaction. Implemented Spring Security, strengthening role-based access controls.
- Introduced school onboarding module, powered by **Node.js** and **PostgreSQL**, reducing manual effort for support team.

Cureya Solutions -Software Trainee

May 2021 - May 2022

- Led NLP pipeline development for text extraction from financial documents by finetuning **ChatGPT**, enhancing accuracy by **30%**. Classified extracted text with **PyTorch** and **BERT**, achieving **93%** accuracy.
- Used **LangChain** to integrate AI flow into **Next.js**, **Flask**, and **MongoDB** based dashboard for user interaction.

PROJECTS

Disease Prediction using Classification Algorithm

(NetCDF, Tableau, PyTorch, PySpark, Hadoop, GCP)

- Processed 30GB of water distribution data to identify trends and patterns. Designed forecasting model using LSTMs, with an MAE of 1.45. Visualized insights and forecasting results using Tableau for data-driven decision-making.
- Conducted rigorous evaluation and selection process to identify the highest-performing model, considering metrics such as accuracy, precision, recall, and F1-score, resulting in a 40% increase in customer conversion rates.

E-Learning Platform

(Java, Java EE, Bash, MySQL)

- Spearheaded the creation and deployment of a quiz functionality that enabled users to evaluate understanding of course material, leading to a 30% improvement in knowledge retention and a 15% increase in course completion rates.
- Developed and deployed an innovative progress tracking solution, integrating user-friendly features and intuitive UI/UX design, resulting in a 50% decrease in user drop-off rates and a 25% increase in overall user engagement.
