QA/QC Engineer

♦ **Detail-oriented QA Engineer** with expertise in **manual and automated testing** across **web and mobile platforms**. Passionate about ensuring software quality and improving user experience.

Skills

Manual Testing: Test documentation (Bug Reports, Test Cases, Checklists, Test Plans), API Testing (Postman), UI/UX Testing, Cross-browser/Platform Testing, Mobile Testing (Android/iOS), Usability Testing

Automated Testing: Selenium WebDriver (**Java, Python**), PlayWright, Cucumber (**Java**), JUnit/TestNG, API Automation, Mobile Automation (Appium),

Development: Python (Pygame), Java, JavaScript, HTML, CSS

Tools & Technologies: Jira, GitHub, VS Code, IntelliJ IDEA, Postman, Selenium, Chrome DevTools, Android Studio

Skillfactory | QA Engineer

February 2024 - January 2025

- Automated and manual website testing
- Development of smoke and unit tests in Java (Selenium WebDriver, JUnit/TestNG).
- API testing using Postman (REST API, collections, test scripts).
- Working with test documentation (test cases, checklists, bug reports).
- ✓ Created and automated smoke tests, which reduced the initial testing time by 30%.
- ✓ Developed API testing scenarios in Postman, identifying 5+ critical integration errors.
- ✓ Conducted cross-browser testing (Chrome, Firefox, Edge), ensuring 100% compatibility.
- ✓ Optimized test documentation, increasing its readability and ease of use for the team.

Projects:

- **"220 Volt"** June 2023 - August 2023

Mobile App: Performed functional, cross-platform, and performance testing across 10+ Android/iOS devices.

- **"Pet House"** April 2023 - June 2023

Website: Executed UI/UX, cross-browser, and integration testing, improving usability by 15%.

- **"Light of the Gospel"** Website: Conducted load and UI/UX testing, ensuring stability under high traffic.
