Professional Summary:

- Cloud and Middleware Manager with over 15 years of experience in designing, implementing, and managing cloud-based and on-premises infrastructures.
- Skilled in cloud optimization (Azure), IT service management, and middleware technologies. Proven expertise in leading technical teams, managing large-scale migrations, and improving operational efficiency through automation.
- Strong background in change management, service continuity, and strategic alignment with business goals. Certified in Azure. Experienced in working with cross-functional teams to deliver optimal client solutions.

Certifications / Courses

- Az-900 Azure Fundamentals
- AZ-104 Azure Administrator
- Oracle Cloud Infrastructure Foundation
- AWS Business Professional
- AWS Technical Professional
- Introduction to FinOps
- Introduction to FOCUS
- SQLServer 2008 Seminar, Universidad La Salle & Microsoft Technet
- Archimate Modeling, Bizdesign
- SQLFundamentals Course, Sololearn
- Digital Acumen & Human-Centered Design, Pwc

Skills and Tools:

- | | | |
|---|---------------------------|--|
| • Azure AZ-900,AZ-104 | • Middleware Management | • Linux/UNIX/Solaris |
| • Cloud Computing | • Tomcat/ IIS / Apache | • Strong Communication |
| • Cloud Management | • System Administration | • OS: Windows XP, Vista, 7, 8, 10, 11, MacOS, RedHat, Solaris, Ubuntu, CenOS, Microsoft Server |
| • Cloud Architecture | • Operations / Monitoring | • Microsoft Office 365 |
| • Cloud Optimization | • Application Deployment | • Excel, Word, PowerPoint |
| • Turbonomic | • IT Service Management | • Google Suite |
| • Park My Cloud, | • Service Continuity | • SharePoint |
| • Cloudability | • Change Management | • PowerBI |
| • FinOps | • Technical Leadership | |
| • Infrastructure | • Agile Methodologies | |
| • Middleware (Oracle Fusion Middleware) | • Enterprise Architecture | |
| | • SQL | |
| | • F5 Load Balancer | |

Professional Experience:

Middleware Manager/Cloud Manager, PwC

Jun 2018 – Oct 2024

Cloud Manager- The Cloud Architect and Engineering role involves designing and implementing cloud and on-prem solutions for our PwC clients, leveraging the NGC technologies, industry best practices and PwC NIS standards to ensure optimal service performance, scalability and security.

- Design and/or implement cloud-based architectures that meet business needs and comply with PwC/NIS standards.
- Collaborate with cross-functional PwC network teams to ensure successful implementation and deployment of cloud-based solutions.
- Stay up to date with the latest cloud-based technologies, industry trends, and emerging solutions.
- Support Global PwC initiative providing guidance to other members firm on Cloud Architecture and Engineering.

Client Engagement Manager- responsible for ensuring that our clients' applications performance and availability are maintained or improved - while driving cost efficiencies. I rely strongly on relationship and influencing skills.

- Engage with IT, business and financial teams across the PwC network who have an interest in the optimization of their cloud usage.
- Create excel or google sheet reports.
- Generate Power BI dashboards to show the potential saving opportunities.

Demand Manager - responsible for reviewing and assign any demand opened by PwC clients.

- In this role I distributed the requests over the GTSEC Team and be in charge of attending any escalation in order to deliver the projects on time.
- Responsible for guiding the PwC Clients according to their needs
- Support PwC clients providing guidance regarding Cloud and PwC offers.
- Review the availability of GTSEC resources to balance the workload.
- Stay up to date with the latest cloud-based technologies and PwC Standards.
- Work closely with the GTSEC team to implement PwC Best Practices in the cloud environments.
- Collaborate with the PMO team to ensure the right assignment of any demand or project request.
