Address: 3212 Cliffview Dr,
Corinth, TX 76210

Education

Bachelor of Mathematics
University of North
Texas

2020 - 2025

Graduated with honors

Bachelor of Computer Science
University of North
Texas

2020 - 2025

Graduated with honors

Skills

Javascript, Typescript, Python, C#,
C++, HTML, CSS, SQL, AWS,
React.js, Svelte, Express.js,
Websockets, Project Management,
CI/CD

Profile

Working towards two separate degrees gave me a large workload with tight deadlines. To get through it, I had to learn how to handle stress, meet deadlines, communicate, and learn new things. I have now graduated with a large breadth of knowledge, and efficiency in tackling new subjects.

While I was in university, I picked up a job as a full stack developer for a research lab. In that job, I became confident in my abilities to develop web applications through the full software development cycle. I communicated with designers, lead teams of developers, planned sprints, and implemented CI/CD for fast iteration.

Work experience

Full Stack Developer

University of North Texas, xREZ Art +
Science Lab

2023 - present

I oversaw the full development cycle of a self hosted, web game, research tool. I worked together with the designers to create the first version of the game using Svelte, Express.js, WebSockets, and Github actions. When more developers were hired, I was in charge of providing documentation of the system and training in how our workplace did things (GitHub issues, agile sprints, documentation, etc.). I was also in charge of coordinating with a separate team that worked on creating a configuration tool for managing game assets. Now that development has scaled back, I am in charge of maintaining the game, and creating a jupyter notebook analysis tool for inspecting generated game data for a research study.
