

Bhavan Reddy Gaddam

Email: gbhavanreddy123@gmail.com | Mobile: 2602478068 | Location: Fort Wayne, Indiana

PROFESSIONAL SUMMARY

- 6+ years of experience as a Full Stack Java Developer, specializing in designing and developing robust software solutions in Agile environments.
- Proficient in Java, Spring, and Spring Boot, with extensive experience in building Microservices that enhance application scalability and performance.
- Hands-on expertise in AWS technologies, including EKS, ECS, Lambda, and Terraform, ensuring efficient cloud resource management and deployment.
- Skilled in troubleshooting, debugging, and upgrading software, consistently delivering high-quality solutions while adhering to best practices.
- Strong background in No-SQL databases such as DynamoDB and MongoDB, facilitating efficient data storage and retrieval for dynamic applications.
- Proven ability to work collaboratively in Scrum teams, contributing to team delivery and actively learning new skills to enhance project outcomes.
- Excellent analytical and problem-solving skills, enabling effective resolution of complex coding issues and enhancing overall software functionality.
- Committed to continuous professional development, holding multiple relevant certifications, including AWS Certified Developer and Oracle Certified Professional.

SKILLS

Programming Languages: Java 11/17, JavaScript, SQL, Python, TypeScript, HTML/CSS, C#, Shell Scripting

Frameworks & Libraries: Spring Framework, Spring Boot 3.x, Microservices Architecture, React, Hibernate, JUnit, Apache Kafka, RESTful Web Services

Databases & Data Warehousing: AWS Aurora Postgres, DynamoDB, MongoDB, Cassandra, MySQL, PostgreSQL, Oracle DB, SQL Server

Big Data & Streaming: Apache Kafka, AWS MSK, Apache Spark, Hadoop

Cloud Platforms: AWS (EKS, ECS, Lambda, S3, RDS), Azure (if applicable), Google Cloud Platform (if applicable)

DevOps & CI/CD Tools: Terraform, Jenkins, Git, Docker, Kubernetes, Ansible, Maven, Gradle

Testing & QA: JUnit, Mockito, Selenium, Postman, Cucumber, TestNG, JMeter

Security & Compliance: AWS Security Groups, IAM Policies, Data Encryption Techniques, OWASP Best Practices

Monitoring & Observability: Datadog, AWS CloudWatch, ELK Stack, Prometheus

Collaboration Tools: Jira, Confluence, Slack, Microsoft Teams, GitHub

Documentation Tools: Markdown, Swagger, Confluence

Operating Systems: Windows, Linux, macOS

CERTIFICATIONS

- Oracle Certified Professional: Java SE 11 Developer
- Spring Professional Certification (VMware)
- AWS Certified Developer – Associate

EDUCATION

MS in Information Technology

Indiana Institute of Technology | GPA: 4.0/4.0

B.Tech in Statistics and Computer Science

Gandhi Institute of Technology | Percentage: 75%

WORK EXPERIENCE

ServiceNow – Atlanta, GA

Senior Full Stack Java Developer – Jan 2024 to Present

- Spearheaded the design and development of scalable microservices using Java and Spring Boot, enhancing system performance by 30% and improving user experience.
- Engineered cloud-native applications deployed on AWS EKS, leveraging Terraform for infrastructure as code, resulting in a 25% reduction in deployment times.
- Collaborated with cross-functional teams to implement CI/CD pipelines using Jenkins, automating testing and deployment processes, which increased release frequency by 40%.
- Optimized application logging and monitoring with Datadog, improving incident response times by 50% through proactive alerting and performance insights.
- Led troubleshooting efforts for complex software issues, achieving a 95% resolution rate within SLA and significantly enhancing system reliability.
- Mentored junior developers on best practices in Agile methodologies, fostering a culture of continuous learning and improvement within the team.
- Developed RESTful APIs for seamless integration with third-party services, increasing data accessibility and reducing latency by 20%.
- Implemented AWS Lambda functions for event-driven architecture, streamlining workflows and reducing operational costs by 15%.
- Enhanced security protocols by configuring AWS Security Groups and IAM roles, ensuring compliance with industry standards and reducing vulnerabilities.
- Conducted code reviews and pair programming sessions, promoting high-quality code standards and reducing technical debt by 30%.

Technologies Used: Java, Spring, Spring Boot, Microservices, AWS EKS, Terraform, Datadog, Jenkins, AWS Lambda, AWS Security Groups

Discover – Riverwoods, IL

Full Stack Java Developer – May 2021 to Sep 2023

- Delivered high-quality software solutions by developing full-stack applications using Java, Spring, and React, achieving a 20% increase in customer satisfaction scores.
- Automated deployment processes using Jenkins and Docker, resulting in a 35% decrease in time-to-market for new features.
- Collaborated with product owners in Agile sprints to define user stories and acceptance criteria, ensuring alignment with business goals and user needs.
- Enhanced application performance through code optimization and refactoring, leading to a 40% reduction in response times for critical services.
- Integrated NoSQL databases like MongoDB for improved data storage solutions, enabling faster data retrieval and analysis capabilities.
- Implemented unit and integration testing frameworks, achieving over 85% code coverage and significantly reducing bug rates in production.
- Participated in cross-team initiatives to align development practices and share knowledge, fostering a collaborative engineering culture.
- Utilized AWS services such as S3 and RDS for data storage and management, streamlining data access and improving application scalability.
- Developed and maintained comprehensive documentation for software architecture and APIs, enhancing team onboarding and knowledge transfer.
- Actively contributed to Agile ceremonies, including daily stand-ups and retrospectives, driving continuous improvement in team performance.

Technologies Used: Java, Spring, React, MongoDB, Jenkins, Docker, AWS S3, AWS RDS, Agile

UnitedHealth Group (Optum) – Eden Prairie, MN

Software Engineer – Jan 2019 to Apr 2021

- Designed and implemented robust software solutions using Java and Spring, contributing to a 15% increase in operational efficiency across healthcare applications.

- Collaborated with data engineering teams to integrate ETL processes, improving data accuracy and reducing processing times by 30%.
- Developed microservices architecture to support scalable application development, resulting in a 25% improvement in system responsiveness.
- Conducted thorough testing and debugging of applications, achieving a 90% reduction in post-deployment defects and enhancing user trust.
- Engaged in Agile development practices, participating in sprint planning and retrospectives to ensure timely delivery of high-quality software.
- Leveraged AWS services, including Lambda and DynamoDB, to create serverless applications that reduced infrastructure costs by 20%.
- Contributed to the development of internal tools for monitoring application performance, leading to proactive issue resolution and improved uptime.
- Collaborated with UX/UI designers to enhance user interfaces, resulting in a 15% increase in user engagement metrics.
- Provided technical support and guidance to junior team members, fostering a collaborative and innovative team environment.
- Implemented security best practices in application development, ensuring compliance with HIPAA regulations and safeguarding sensitive data.

Technologies Used: Java, Spring, AWS Lambda, DynamoDB, Agile, ETL, Microservices, UX/UI Design
