Summary

Full Stack Engineer with 6 years of experience delivering scalable, robust web applications. Expertise in the MERN stack, modern DevOps practices, and both manual and automated testing has driven the development of successful, real-time, data-driven solutions across diverse projects. Proven ability to communicate effectively with clients and collaborate in agile, cross-functional teams. Committed to clean, maintainable code, thorough testing practices, and innovative problem-solving through end-to-end software development.

SKILLS

- **Technology:** HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, TypeScript, jQuery, React, React Query, Redux, Redux Toolkit, React Native, Angular, Material UI, Semantic UI,
- **Performance & Optimization:** Google PageSpeed Insights, GTmetrix, Lighthouse, WebPageTest, YSlow
- **Backend & API Development:** Node.js, Express.js, NestJS, FastAPI, REST API, GraphQL, TypeORM, Sequelize, Mongoose API
- **Documentation & Testing:** Swagger (OpenAPI), Postman, Insomnia, SoapUI, Artillery
- **Database:** MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, Mongoose
- **Testing & Quality Assurance:** Cypress, Jest, Sentry, Mocha, Enzyme, Selenium, Cheerio, Puppeteer
- **Wireframe Tools:** Figma, Balsamiq, InVision, Canva, Justinmind, Moodboard
- **DevOps:** Docker, Kubernetes, AWS (EC2, S3, Lambda, Amplify), Netlify, Ngrok, Jenkins
- **Version Control System:** Git, Github, Gitlab, Bitbucket
- **Project Management Tools:** Jira, Asana, Trello, Basecamp, Wrike, Slack, Google Meet, Zoom, Discord

WORK EXPERIENCE

Devsinc

Nov 2023 - Present

Lead Engineer

- Led the development and deployment of microservices-based systems using the MERN stack and Dockerized environments.
- Delivered end-to-end features like payment integrations, real-time notifications (WebSockets), and data dashboards.
- Built and scaled multi-tenant e-commerce platforms using React, Redux Toolkit, and Node.js.
- Managed deployment pipelines via Jenkins and AWS Lambda; automated testing pipelines with Jest and Cypress.
- Facilitated sprint planning and client demos, ensuring timely delivery of business-critical updates.

Letsremotify

Mar 2022 - Nov 2023

Full Stack Engineer

- Delivered 4+ production-grade applications using React, Node.js, and PostgreSQL in Agile workflows.
- Modernized monolithic applications into modular microservices with NestJS, improving scalability by 40%.
- Integrated complex third-party services (Stripe, Google Maps, Firebase, social logins) across multiple products.
- Collaborated with cross-functional teams (QA, UI/UX, PMs) to implement robust CI/CD pipelines.
- Actively mentored junior developers and participated in hiring and code review processes.

VisionBirdTechnologies

Jan 2021 - Mar 2022

Frontend Team Lead

- Spearheaded UI architecture and best practices across 3 large-scale web applications.
- Developed responsive UIs using Tailwind CSS, Material-UI, and Bootstrap.
- Implemented optimized UI rendering with lazy loading, code-splitting, and React performance hooks.
- Translated complex wireframes from Figma and Adobe XD into pixel-perfect React components.
- Initiated component library development for reusable UI parts across the org.

Hazel Mobile

June 2019 - Jan 2021

Frontend Engineering Manager

- Managed a frontend team to build scalable B2B and B2C SaaS platforms with React and Next.js
- Created internal tooling dashboards and customer portals with Material UI and Redux.
- Defined coding standards, test coverage expectations, and held bi-weekly code review sessions.
- Increased page load speed by 30% through bundle optimization and Lighthouse-based audits.

GaoTek.

Jan 2018 - Jun 2019

Full Stack Engineer

- Developed full-stack inventory and tracking systems for industrial IoT devices using Express.js and MongoDB.
- Built and consumed RESTful APIs and created modular components for various dashboards.
- Used WebSockets for real-time updates and push notifications across dashboards.
- Optimized API response time by 20% through query optimization and schema indexing.

EDUCATION

University of Engineering and Technology, Lahore

GPA: 3.7

Bachelor of Science in Computer Science

Projects

Miza

- I played a key role in developing internal Venture Studio modules for a web fintech application, utilizing React JS and Node.js to deliver robust and user-friendly solutions.
- The application featured advanced authentication mechanisms, including user sign-in/sign-up with OTP-based two-factor authentication (2FA), as well as comprehensive ID verification processes such as KYC (Know Your Customer), KYB (Know Your Business), and AML (Anti-Money Laundering) checks.
- Additionally, I integrated SMS messaging capabilities using Unifonic to ensure seamless communication with users.

Rabbit Care

- I developed a comprehensive system for efficiently managing patient records, appointments, and billing processes, tailored to meet the specific needs of healthcare providers.
- The system incorporated role-based access controls, ensuring that administrators and healthcare professionals had appropriate permissions to maintain security and streamline operations.

JamboJack

- I developed a web application designed to bring salon services directly to customers' doorsteps, offering convenience and accessibility.
- Leveraging modern technologies, the application was built with React and TypeScript for a responsive and interactive user interface, ensuring a seamless user experience.
- On the backend, I utilized NestJS to create a robust, scalable API and integrated PostgreSQL for efficient data management and storage.
- The application enabled users to browse services, book appointments, and manage bookings effortlessly, providing a streamlined and user-friendly platform for salon services.

Maple HR

- Front-End Enhancements: Improved UI responsiveness by 25% and increased engagement by 20% through collaborative design implementation with React and CSS.
- Interactive UI Development: Created user-centric interfaces using jQuery and CSS for an enhanced browsing experience that aligns with usability standards.

Kameza

- As a front-end developer for the Kameza E-commerce Application, I played a key role in optimizing the platform's performance, improving user experience, and ensuring scalability.

- My efforts included reducing the JavaScript bundle size by refactoring components and eliminating unused dependencies, which significantly enhanced the application's loading speed and overall responsiveness.
- By prioritizing clean, efficient code and a seamless user interface, I contributed to delivering a more engaging and high-performing e-commerce experience for users.

Book with Star

- Worked on the backend development of a mobile food delivery app.
- Integrated Google Maps API for location-based services and Stripe for secure payment processing.
- Enhanced the app's performance by employing Redux for state management and optimizing API calls.

Panda

- Contributed to the development of Panda, an e-commerce web application designed for seamless online shopping experiences.
- Focused on building intuitive user interfaces and optimizing application performance using modern web technologies.
- Implemented core features such as product catalogs, user authentication, and secure checkout processes.
- Enhanced the platform's scalability and responsiveness to ensure a smooth user experience across devices.
- Collaborated with cross-functional teams to integrate APIs, improve backend efficiency, and deliver a high-quality e-commerce solution.

Killow

- Developed a comprehensive weight-loss app tailored for young adults in Saudi Arabia, focusing on personalized and expert-driven health management.
- Utilized Node.js for the backend and ReactJS for the front end to create a seamless and engaging user experience.
- Integrated Firebase Auth for secure authentication, enabling video consultations and robust data protection.
- Leveraged Redux Toolkit for efficient state management and SQL databases for reliable data storage.
- Ensured the application adhered to local and international regulations, delivering a high-performance, user-friendly platform for effective health management.

CERTIFICATES

- JavaScript Algorithms and Data Structures, Crash Course in ReactJS by Google, ReactJS by Coursera

ACHIEVEMENTS

- YouTube Monetization:** Grew and monetized my tech YouTube channel, *Efficient Learning World*, reaching 3K+ subscribers and 400K+ views.
- Top Speaker, UET Tech Week (2021):** Conducted Node.js + React workshops attended by 150+ students.
- MERN Webinar Host (2020):** Hosted 200+ attendee webinars, later adopted as a reference by UET CS faculty.
- Mentor Recognition (2021):** Guided UET bootcamp students in React/Node.js capstone projects.
