SUMMARY

Full Stack Java Developer with 4+ years of experience building scalable microservices and responsive web applications across healthcare, banking, and eCommerce domains. Skilled in Java, Spring Boot, ReactJS, Node.js, and cloud platforms (AWS, Azure, GCP). Experienced in performance optimization, CI/CD automation, and improving system reliability. AWS Certified Solutions Architect - Associate with hands-on expertise in API security, event-driven architectures, and Generative AI/ML solutions.

EXPERIENCE

- Full stack java developer, Mayo Clinic, Rochester, United States

May 2024 — Dec 2024

 - Developed enterprise-grade microservices with **Spring Boot**, **Spring Cloud**, and **RESTful APIs** for scheduling, lab results, and patient management, reducing API response times by 30% and ensuring 99.9% uptime for 1M+ patient records.
 - Designed and delivered **responsive ReactJS dashboards** with **Bootstrap** and **Chart.js** for real-time health metrics visualization, increasing clinician engagement by 25% and reducing data lookup time by 40%.
 - Implemented secure **OAuth2 + JWT authentication**, achieving 100% HIPAA compliance and zero unauthorized access incidents; automated **CI/CD** with **Jenkins** and **GCP Cloud Build**, cutting deployment time from 2 days to <4 hrs, boosting release frequency 60%, and achieving 95% on-time releases.
 - Improved system **reliability** and **performance** with **architectural tuning**, async data fetching, and proactive monitoring (MTTR ↓45%, downtime ↓35%); boosted quality by building **JUnit/Mockito** tests, **API docs**, and integration validations, raising test coverage to 85% and cutting defects 30%.
- Full stack java developer, NIVEUS SOLUTIONS, Mangalore, India

Dec 2021 — Jul 2023

 - Modernized legacy dashboards by migrating from monolithic architecture to **microservices** using **Spring Boot**, **Spring MVC**, and **Spring Security**, improving modularity and reducing deployment time by 40%.
 - Built responsive dashboards with **ReactJS** for customer account management, increasing teller efficiency by 30% and reducing onboarding time by 25%.
 - Built secure **backend APIs** with **Spring Data JPA** and **Cloud SQL**, using **GCP Cloud Storage** + IAM encryption to pass 100% of security audits; implemented Spring Security with JWT-based RBAC and SSL, ensuring zero production breaches.
 - Implemented event-driven architecture with **Apache Kafka** and **Azure Application Insights**, cutting incident detection and RCA time by 50%; automated CI/CD with **Jenkins** and **GCP Cloud Build**, built **Node.js** utilities, and optimized SQL, reducing deployment errors and boosting teller efficiency.
- Software Engineer, eBay, Hyderabad, India

May 2020 — Dec 2021

 - Developed a full-featured eCommerce platform using **Spring Boot**, **ReactJS**, and **Redux**, delivering modules for catalog, search, cart, checkout, and payments, supporting 100K+ monthly transactions.
 - Deployed microservices on **AWS EC2** with Elastic Load Balancer (ELB) and Auto Scaling, managed assets with S3 + **CloudFront CDN**, and modeled data using **RDS (MySQL)** and **DynamoDB**, improving platform scalability by 40%.
 - Implemented event-driven workflows with **SQS**, **SNS**, and **AWS Lambda** for asynchronous order processing, inventory synchronization, and real-time notifications, reducing order latency by 35%.
 - Built secure **CI/CD pipelines** with **Jenkins** and **AWS CodeDeploy**, enforced permissions with IAM policies, and monitored systems using CloudWatch and CloudTrail, achieving 99.9% deployment success rate.
 - Optimized **frontend** and **mobile** with lazy loading, code splitting, and **React Native**, cutting load time 45% and boosting engagement 30%; led vendor integrations, raising order success 20%.
- Graduate research assistant - Full stack java developer, University of Dayton, OH

Jan 2025 — May 2025

 - Designed and developed internal research management tools using **Spring Boot**, **ReactJS**, and **MongoDB**, streamlining faculty data handling and project metadata tracking, reducing manual data entry by 40%.
 - Built and secured **REST APIs** with **Spring Security**, **OAuth2**, and **JWT**, implementing role-based access control (RBAC) and ensuring 100% compliance with institutional data security policies.
 - Enhanced XML parsing and **transformation layers** in the checkout module to support legacy payment partner integrations, ensuring seamless backward compatibility and increasing successful transactions by 15%.
 - Performed performance optimization and proactive monitoring using **Azure Application Insights** and **Log4j**, improving system stability and reducing mean-time-to-resolution (MTTR) by 30%.

PROJECTS

- NLP Sentiment Analysis Chatbot, University of dayton, University of dayton

 - Designed and deployed an NLP-powered chatbot using Python (scikit-learn, NLTK, spaCy), TF-IDF/word embeddings, and Flask/Streamlit, implementing preprocessing (tokenization, stop-word removal, lemmatization) and training sentiment models to classify text with >90% accuracy, enabling real-time, context-aware responses for customer support, feedback analysis, and e-learning use cases.

EDUCATION

University of Dayton, Dayton, United States - Masters, Computer Science
CMR technical campus - Bachelors, Electronics and communications

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (2025-2028)

SKILLS

Backend Development	: Java (8/11/17), Spring Boot, Spring Cloud, Spring Security, Hibernate, Microservices, Node.js
Frontend Development	: ReactJS, Angular, Next.js, React Native, TypeScript, JavaScript, HTML5, CSS3, Chart.js
Cloud Platforms & Services	: AWS (EC2, S3, Lambda, CloudFormation/CDK, CodeDeploy, CloudWatch, IAM), Azure (Blob Storage, App Insights, DevOps), GCP (GCS, Cloud Run, Cloud Functions)
Databases	: MySQL, PostgreSQL, MongoDB, DynamoDB, Cassandra
Security	: OAuth2, JWT, RBAC, SSL
Generative AI & ML Tools	: OpenAI GPT, HuggingFace Transformers, LangChain, AWS SageMaker
CI/CD & DevOps	: Jenkins, Azure DevOps, Maven, Gradle, Docker, Kubernetes
Testing & API Tools	: JUnit, Mockito, Jest, Postman, Swagger UI
Monitoring & Logging	: Log4j, Splunk, CloudWatch, Azure Monitor
Methodologies	: Agile (Scrum, Kanban)
Collaboration	: Git, GitHub, Bitbucket, Jira, Confluence
