Summary

Motivated Software Engineer with 2+ years of experience in automation, web development, data analysis, and cloud technologies. Proficient in Python, OpenCV, and edge computing. Skilled in troubleshooting, system calibration, and remote support. Strong problem-solving and communication skills, with a focus on industrial automation and collaboration.

Work Experience

Kgate Technologies Inc | Software Engineer

Jul 2024 - Present

- Analyzed data from databases, spreadsheets, and APIs to drive business decisions and identify trends.
- Applied statistical techniques (EDA, hypothesis testing) for actionable insights.
- Conducted A/B testing and predictive modeling to improve processes and solve business challenges.
- Collaborated with cross-functional teams to deliver data-driven solutions.

Sapmount Technologies Inc | Software Engineer Intern

Nov 2023 - Jul 2024

- Designed, developed, and tested web and client-server applications aligned with company standards.
- Provided ongoing maintenance and support for software projects, ensuring reliability and availability.
- Delivered weekly status reports and timesheets, ensuring transparency and progress tracking.
- Collaborated with managers and HR to define deliverables, clarify expectations, and streamline onboarding processes.

Wipro Technologies | Software Engineer

Jun 2019 - Nov 2021

- Designed and implemented a Data and Analytics platform using Azure Cloud, Azure DevOps (CI/CD), and Matillion (ETL), streamlining data workflows and improving efficiency.
- Automation Projects: Automated Cognitive Insight website and Galaxy Audit bot using MPA BOT and Sikuli, enhancing user experience, operational efficiency, and achieving 60% accuracy and time savings.

Education

Pittsburg State University

Jan 2022 - May 2023

Masters, Information Technology

- **Achievements:** GPA: 3.9

Gudlavalleru Engineering College

Aug 2015 - Mar 2019

Bachelor, Computer Science Engineering

- **Achievements:** GPA: 3.5

Projects

Real-Time Object Tracking System Using OpenCV | Personal Project

Feb 2025 - Mar 2025

- Developed and implemented a real-time object tracking system using OpenCV and advanced tracking algorithms (CSRT/KCF).
- Selected and initialized objects for tracking in the first frame of a video stream.
- Configured and implemented CSRT/KCF trackers for robust and efficient object tracking.
- Tracked objects across video frames and visualized results by drawing bounding boxes around the tracked object.
- Optimized the system for real-time performance and handled tracking failures gracefully.
- Documented the implementation process, results, and system performance for future reference.
- Outcome: Built a lightweight, efficient object tracking system capable of real-time performance, demonstrating foundational skills in computer vision, OpenCV, and AI-powered tracking algorithms.
- Tools & Technologies: OpenCV, Python, CSRT/KCF Trackers, Video Processing

Clinical Documentation Automation Tool | Personal Project

Jan 2025 - Feb 2025

- Developed a Flask-based web app to automate clinical note creation from doctor-patient interactions, streamlining workflows.
- Integrated OpenAI GPT-4 and Whisper APIs for speech-to-text transcription and SOAP note generation, ensuring medical compliance.
- Designed a responsive frontend (Bootstrap) and implemented real-time audio recording (sounddevice) for seamless conversation capture.
- Designed a responsive frontend with Bootstrap for an intuitive user interface, enabling recording, transcription, and note generation.
- Built a mock EHR system using JSON for data storage, enhancing efficiency and accuracy in clinical documentation.
- Technologies Used: Flask (Python), OpenAI GPT-4, Whisper API, HTML, CSS, Bootstrap, sounddevice, scipy.io.wavfile, JSON (mock EHR integration).

Skills

- **AI & Computer Vision:** OpenCV, CSRT/KCF Trackers, AI-based Image Processing, Object Detection & Tracking
- **AI Frameworks:** RAG (Retrieval-Augmented Generation), AI Agents, GPT-4 Integration
- **APIs & Integrations:** OpenAI GPT-4, Whisper API, REST APIs
- **Programming :** Java, Python
- **Web Development:** Flask, HTML, CSS, Bootstrap, MVC Architecture
- **Cloud & DevOps:** Azure Cloud, Azure DevOps, CI/CD Pipelines, Matillion (ETL)
- **Networking:** Basic understanding of networking protocols and cloud-based AI deployment
- **Interpersonal Skills:** Team Leadership, Adaptability, Communication Skills, Problem-Solving, Collaboration
