SUMMARY

Highly skilled Software Engineer with 4+ years of experience in Java, Golang, Angular, TypeScript, and React Native, building scalable, high-performance web and mobile applications. Experienced in developing microservices and RESTful APIs using Spring Boot and modern framework principles. Skilled in real-time data visualization, reusable component design, and REST API integration with secure authentication.

WORK EXPERIENCE

Software Developer, Rettrack LLC, Remote May 2025 — Present

- End-to-End Development:** Sole developer of DoughCook, a cross-platform stock pattern analysis app built with React Native, Expo CLI, TypeScript, and Java using Spring Boot and Golang microservices for backend integration.
- UI/UX Engineering:** Designed multilingual onboarding flows, global search, overlays, and responsive layouts, improving discoverability across 10K+ stock symbols using Agile methodologies and DevOps practices.
- Real-Time Visualization:** Implemented dynamic candlestick visualizations with Lightweight Charts, optimizing rendering performance and delivering seamless zoom and pan interactions for real-time financial data analysis.
- Architecture & Reusability:** Built modular, reusable components with theme support and optimized state management using a scalable framework aligned with SDLC best practices.

Software Engineer, Inrhythm solutions, India Feb 2021 — Aug 2023

- Frontend Performance Optimization:** Engineered high-performing Angular application with TypeScript, HTML5, CSS3, and Java integration, reducing page load times by 40% and improving responsiveness for enterprise dashboards.
- UI/UX Enhancements:** Delivered responsive, accessible (WCAG 2.1) interfaces with AG Grid and ECharts for real-time visualizations under Agile methodologies and DevOps collaboration.
- Advanced Angular Practices:** Implemented lazy loading, OnPush change detection strategy, and modular architecture using microservices concepts to enhance scalability and performance.
- Testing & Debugging:** Resolved 100+ high-priority bugs and automated testing with Cypress, boosting stability and cutting regression issues.
- Collaboration & Delivery:** Partnered with .NET backend teams on secure API integration and refactored codebases with SonarQube to improve scalability and maintainability by 20%, leveraging Azure cloud services and SDLC principles.

Software Engineer, ISpace, India Jan 2020 — Dec 2020

- Angular Development:** Built and maintained reusable Angular components (forms, tables, navigation) with TypeScript, HTML5, and SCSS, integrating with Java Spring Boot APIs to accelerate feature delivery by 25%.
- Architecture & Reusability:** Designed micro frontend-ready modules with shared state management patterns and microservices architecture, enabling parallel development across teams using Agile methodologies.
- API Integration:** Secured API access with interceptors and guards, improving authentication flows and error handling.
- Performance & Quality:** Applied OnPush strategy and RxJS optimizations to reduce change detection overhead.
- Testing:** Wrote comprehensive unit tests with Jasmine, achieving 85%+ coverage and reducing production bugs by 20%, following SDLC and DevOps best practices.

EDUCATION

University of North Texas, Denton, United States - Masters in Computer and Information Sciences May 2025

MVSR Engineering College, Hyderabad, India - Bachelor of Engineering May 2021

CERTIFICATIONS

[Angular - The Complete Guide \(2024 Edition\)](#)

[Foundational C# with Microsoft](#)

[The Complete C# Programming Course](#)

PROJECTS

DoughCook | React Native, Expo, Typescript

- Built a cross-platform stock trading insights app (iOS, Android, Web) with React Native + Expo, integrating Java and Golang microservices for backend scalability and performance. Featured real-time candlestick charts, technical overlays, and gesture-based zoom/pan using Lightweight Charts. Implemented global search across 10K+ stock symbols.

Dhiva | Angular, Node.js, Ag-grid, Typescript

- Developed an enterprise reporting tool with interactive dashboards using Angular, AG Grid, and ECharts to handle 200+ real-time reports via REST APIs & WebSockets. Enhanced security with JWT/OAuth2 and integrated Java Spring Boot services to support microservices architecture. Applied Agile methodologies and DevOps practices to streamline the SDLC and reduce deployment time by 25%.

SKILLS

Frontend Frameworks & Tools	: Angular, React Native, Expo CLI, Angular CDK, AG Grid, ECharts, Responsive Web Design, Progressive Web Apps (PWA), State Management (NgRx/Redux, Context API).
Languages & Styling	: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Material UI, Cross-Browser Compatibility
Testing & Debugging	: Cypress, Jasmine, Postman, Chrome DevTools
Databases & Storage	: MySQL, LocalStorage, SessionStorage
Version Control & Tooling	: Git, GitHub, Webpack, ESLint, Prettier, Docker (Basic)
Concepts & Methodologies	: OOPS, RESTful APIs, RxJS, Agile/Scrum, Sprint Planning, Story Grooming, Code Reviews
Relevant Skills	: Spring Boot, Java, Azure, Golang, Microservices
