Summary

Senior-year Computer Science student with experience in software engineering, machine learning, and web development. Seeking an entry-level position to leverage my skills in Python, Java, Web Development, and machine learning.

Experience

- 4/23 - 9/23 **Data Analytics Intern, Jacksonville Jumbo Shrimp, Jacksonville, FL**
- Maintained Hawkeye Training Software, ensuring data accuracy and system reliability.
 - Collaborated with team members to analyze player performance data.
- 1/23 - **Software Engineer Intern, Light Snack LLC, Remote**
- Current
- Assist with software development and engineering efforts.
 - Troubleshoot and resolve technical issues.
 - Implement new features that enhance user experience and engagement.

Projects

- Web Development Light Snack Website/Online Shop: Developed and maintained an e-commerce website using HTML, CSS, and JavaScript.
- Java Work Order Generator: Created a Java application to automate work order generation.
- Survey GUI: Developed a graphical user interface for surveys.
- Python Stock Alert Bot: Implemented a Python bot to track stock prices and send alerts when prices reach specified thresholds.
- Embedded Systems (C) Two Pass Assembler: Designed a two-pass assembler for an educational embedded systems project.

Education

- 2021 - 2025 **Bachelor of Science in Computer Science, University of North Florida, Jacksonville, FL**

Skills

- Programming Languages Python, Java, JavaScript, HTML, CSS, C, C#, React
- Technologies AWS, Git, Node.js, Machine Learning, EC2
