

Yaswanth Krishna Karuturi

📍 Fort Wayne, IN 📞 +1-260-418-6617 ✉ ykkaruturi@gmail.com 🔗 <https://www.linkedin.com/in/yaswanthkkruturi>

SUMMARY

Results-driven **Software Engineer** with **6 years** of experience in backend and full-stack development, specializing in **Java**, **Spring Boot**, and **microservices architecture**. Proficient in building scalable **RESTful APIs**, optimizing database performance, and deploying cloud-based solutions on **AWS**. Experienced in **Angular**, **React**, and **JavaScript**, delivering responsive Single Page Applications (SPAs). Passionate about performance optimization, security, and cloud-native architectures, seeking opportunities to drive innovation in software development.

EDUCATION

Purdue University Fort Wayne, IN, USA

Jan 2023 - May 2024

Master of Science, Computer Science (GPA: 4.0/4.0)

National Institute of Technology Agartala, India

Jul 2013 - May 2017

Bachelor of Technology, Electronics & Instrumentation

SKILLS

- **Languages:** Java, JavaScript, Python
- **Frameworks:** Spring Boot, Angular, React, Flask
- **Database:** MySQL, Oracle SQL, MongoDB, DynamoDB, Redis
- **Tech Stack:** REST APIs, Node.js, JUnit, Mockito, SonarQube Postman, Agile, Scrum
- **Cloud:** AWS (IAM, S3, ECS, EKS, Lambda), Docker, Kubernetes, CI/CD (Jenkins, Git, Maven, Gradle)

EXPERIENCE

Outlier.ai | AI Software Engineer | Freelance, Remote, US

Dec 2024 - Present

- Reviewed and optimized large-scale **Java codebases**, improving efficiency, structure, and maintainability across multiple projects.
- Developed evaluation frameworks to enhance debugging accuracy and code quality, reducing errors and ensuring consistency.
- Worked on multiple **Java-driven** projects, applying software **design patterns** and **algorithmic techniques** to refine complex codebases, resulting in improved code efficiency and maintainability.

Creative Tech Mars Software Solutions Pvt Ltd | Software Engineer | Hyderabad, India

Aug 2019 - Dec 2022

- Played a significant role in developing and maintaining 'Roll Out', a web-based self-service application, within an Agile Scrum team, enhancing collaboration and productivity.
- Designed and implemented **RESTful APIs** and microservices with **Java**, **Spring Boot**, & **Spring MVC**, ensuring seamless integration between frontend and backend components.
- Designed and built a Task Management **microservice** for task assignment and status tracking, streamlining workflows.
- Optimized **MySQL** performance using **Hibernate**, **Spring Data JPA**, and **JPQL**, improving query efficiency and reducing latency.
- Built a scalable SPA using **Angular** and **TypeScript**, optimizing performance with lazy loading and reusable components.
- Optimized **HTTP** requests and **API** integration using **Angular HttpClient**, reducing latency and improving real-time data updates.
- Resolved defects using **JIRA** and addressed **SonarQube** violations in **CI/CD** pipelines with Jenkins.

CGI Group Inc | Software Engineer | Hyderabad, India

Nov 2017 - Aug 2019

- Migrated **Trade-360 (JTPS)** from PowerBuilder to Java, modernizing a global trade solution for **SEB**, a Swedish bank.
- Implemented new Change Requests (CRs) involving front-end (**AngularJS**, **HTML/CSS**) and back-end (**Java**) updates for new releases.
- Wrote and optimized **Oracle SQL** queries for CRs, enhancing functionality and improving database performance.
- Developed numerous new controllers and **APIs** for integration with **UI** and external systems.
- Developed and executed unit tests using **JUnit** and **Mockito**, ensuring system reliability and performance.
- Addressed **runtime exceptions** during daily deployments in developers' environments, reducing downtime and enhancing efficiency.
- Resolved front-end and back-end code bugs using the **JIRA** defect tracking tool.

PROJECTS

Bhajan Society | Purdue University

Aug 2023 - May 2024

- Developed **Bhajan Society**, a web platform to enhance community engagement through event management and donation tracking.
- Built a responsive UI with **React.js**, enabling seamless event creation, donor tracking, and volunteer management.
- Implemented secure authentication and role-based access control, improving data privacy and user-specific access management.
- Developed backend services with **Python Flask**, enabling efficient event scheduling, donation tracking, and dynamic data retrieval using **MongoDB**.
- Deployed on **AWS S3** & **AWS EC2**, ensuring high availability and efficient server management.

UniDive | Purdue University

Jan 2023 - May 2023

- Developed **UniDive**, a web application assisting international students in navigating university life, providing university, course, and local amenity information.
- Built login & signup functionality and an intuitive dashboard using **React.js**, enhancing user experience.
- Built authentication and user management APIs with **Node.js** & **Express**, ensuring efficient data retrieval.
- Utilized **MongoDB** for efficient data storage and retrieval, optimizing query performance.
- Deployed frontend on **AWS S3** + **CloudFront** and backend on **AWS EC2**, ensuring high availability.
