

ADARSH SURESH

Security Analyst

Email: Adarsh.suresh.b@gmail.com | Phone: +1(860) 692-0585 | Location: Fairfield, CT | [LinkedIn](#)

SUMMARY

- Security Analyst with over 5 years of expertise in securing enterprise systems, cloud environments, and virtualized infrastructures.
- Proficient in cloud security (AWS, Azure, Google Cloud), endpoint protection (CrowdStrike, Microsoft Defender), and identity & access management (IAM).
- Strong background in threat detection and incident response using tools like SIEM (Splunk, QRadar), EDR/XDR, and penetration testing (Burp Suite, Nmap).
- Expertise in automated security operations with scripting languages such as Python, PowerShell, and Bash, enhancing security efficiency.
- Skilled in implementing data protection strategies with encryption (AES, RSA) and data loss prevention (DLP) techniques to ensure compliance (HIPAA, ISO 27001, NIST).
- Adept at compliance & governance (ISO 27001, NIST, GDPR) ensuring adherence to regulatory requirements across cloud and on-prem environments.
- Hands-on experience in securing CI/CD pipelines and DevSecOps using Docker, Kubernetes, and CI/CD security tools like GitHub Actions and Jenkins.
- Strong track record of integrating AI-driven security protocols to optimize threat detection and resource allocation, achieving significant improvements in security response.
- Proven success in vulnerability management, conducting regular security assessments, and implementing automated incident response workflows for faster threat mitigation.
- Collaborative team player skilled in working cross-functionally to enhance security posture management and improve overall system protection.

SKILLS

- **Network Security:** Firewalls (Palo Alto, Fortinet), IDS/IPS (Snort), VPNs, Zero Trust Architecture, Network Protocols (TCP/IP, DNS, HTTP)
- **Cloud Security:** AWS Security, Azure Security, Google Cloud Security, Identity & Access Management (IAM), Cloud Security Posture Management (CSPM)
- **Endpoint Security:** EDR/XDR (CrowdStrike, Microsoft Defender), Mobile Device Management (Intune, Jamf)
- **Application Security:** OWASP Top 10, Secure Coding (Python, Java), API Security (OAuth, JWT)
- **Data Security:** Encryption (AES, RSA), Data Loss Prevention (DLP), Public Key Infrastructure (PKI)
- **Identity & Access Management (IAM):** Multi-Factor Authentication (MFA), Single Sign-On (SSO), Privileged Access Management (PAM)
- **Threat Detection & Incident Response:** SIEM (Splunk, QRadar), Incident Response (NIST Framework), Threat Intelligence
- **Vulnerability Management:** Nessus, Qualys, Penetration Testing (Burp Suite, Nmap)
- **Compliance & Governance:** NIST, ISO 27001, GDPR, HIPAA
- **DevSecOps:** CI/CD Security (GitHub Actions, Jenkins), Container Security (Docker, Kubernetes)
- **Scripting & Automation:** Python, PowerShell, Bash
- **Other Tools:** Wireshark, ServiceNow, Jira, Microsoft Visio, ChatGPT

WORK EXPERIENCE

Humana

August 2024 – Current

Security Analyst

- Spearheading cloud security initiatives to automate and secure insurance claim processing using AWS platforms, enhancing security protocols for patient and claim data, achieving a 20% reduction in security incidents and ensuring compliance with HIPAA and GDPR.
- Enhanced security protocols for patient and claim data by implementing advanced encryption methods (AES, RSA) and data loss prevention (DLP) strategies to ensure compliance with HIPAA and GDPR.
- Integrated Identity & Access Management (IAM) solutions across cloud environments, enforcing role-based access controls (RBAC) and multi-factor authentication (MFA) to safeguard sensitive information.
- Implemented robust threat detection using SIEM platforms like Splunk, providing continuous monitoring, real-time incident response, and threat intelligence to protect against evolving security threats.
- Collaborated with the DevSecOps team to secure CI/CD pipelines, integrating automated security checks and container security solutions (Docker, Kubernetes) to maintain a secure deployment process.
- Conducted regular vulnerability assessments and penetration testing (Burp Suite) to identify and remediate security weaknesses in the cloud-based infrastructure supporting the claim processing system.

Security Analyst

- Led the integration of next-gen EDR solutions like CrowdStrike across Dell's enterprise systems to enhance endpoint security, providing comprehensive detection, investigation, and real-time response to potential threats.
- Deployed and managed EDR solutions across a diverse range of endpoints, ensuring all devices were continuously monitored for suspicious activities and threats, improving incident detection capabilities by 30%.
- Automated security incident response workflows with CrowdStrike, leading to a more efficient process and improved reaction times.
- Performed regular security assessments to adjust EDR system configurations, enhancing threat detection and safeguarding against unauthorized access across corporate networks.
- Worked closely with cross-functional teams to integrate endpoint protection tools with existing network security infrastructure, including firewalls (Palo Alto, Fortinet) and VPN solutions.
- Utilized advanced vulnerability management tools such as Nessus and Qualys to conduct proactive endpoint vulnerability scans, identifying and mitigating security risks across Dell's hardware and software environments.
- Optimized endpoint security by configuring real-time alerts for malicious activity, allowing for faster detection and containment of breaches.
- Supported compliance efforts by ensuring endpoint protection solutions met ISO 27001 and NIST standards, ensuring regulatory requirements were adhered to.
- Provided training to internal teams on EDR best practices and incident handling procedures, empowering them to respond more efficiently to security incidents.

VMware

August 2017 – March 2019

Security Analyst

- Directed the integration of AI-based security protocols to improve VMware's data center virtualization, automating threat detection and optimizing resource allocation, which led to a 30% increase in threat detection efficiency.
- Applied sophisticated cloud security protocols to VMware vSphere environments, safeguarding the integrity and confidentiality of virtualized resources in line with compliance requirements.
- Leveraged cloud security solutions from AWS and Azure to protect virtual environments, enhancing the overall security posture of VMware's multi-cloud infrastructure.
- Incorporated AI tools to streamline incident response, automating threat detection and analysis, and reducing the need for manual intervention within VMware's virtualized data centers.
- Teamed up with various teams to incorporate machine learning models for predictive threat detection, strengthening security response across both cloud and on-prem infrastructure.
- Secured network traffic between virtual machines and external systems using firewalls (Palo Alto, Fortinet) and VPN solutions to protect communication and data within virtualized environments.
- Ensured adherence to compliance frameworks such as ISO 27001 and NIST, implementing security measures that met stringent industry standards for data protection.
- Streamlined security operations by automating key processes with Python and PowerShell, enhancing vulnerability management and fortifying threat intelligence across VMware's virtualized environments.

PROJECTS**Cloud Compliance Automation**

- Developed automated compliance checking systems for cloud platforms, ensuring continuous monitoring and adherence to industry standards like ISO 27001 and NIST.
- Integrated vulnerability management tools (Nessus, Qualys) into cloud environments for proactive risk mitigation and compliance reporting.

Multi-Cloud Security Posture Management

- Deployed CSPM solutions to monitor and manage security posture across multiple cloud environments, ensuring compliance with cloud security best practices.
- Automated security incident response for cloud infrastructures using Python, streamlining vulnerability management and incident containment processes.

EDUCATION

- **Master in Cybersecurity**
Pace University, New York | **GPA: 3.8/4.0**
- **Bachelor in Electronic and Communication Engineering**
PRIST University, Thanjavur, Tamil Nadu | **GPA: 8.5/10.0**

August 2022 – May 2024

June 2014 – June 2018
