 +1 (623) 505-8704 |  Phoenix, AZ

An Intuitive UX/UI and visual designer with 3+ years of experience crafting digital products, brand-aligned visuals, and interactive user experiences. A strong believer that great design starts with empathy along with user-first mindset. I thrive in agile, cross-functional teams where collaboration meets high-quality execution.

Experience

UX & Visual Designer | The Meteor Studio, Phoenix, AZ | Part-Time

Feb 2024 – Present

- Built a gamified learning experience for Scottsdale Water by implementing design thinking and user centric design, created mini-games, user flows and user interfaces in Figma and Unity game engine which boosted awareness and retention of water purification concepts by 40% across Arizona classrooms.
- Integrated visual storytelling principles and branding strategy to design promotional banners for ASU's Robotics Lab using Illustrator, that increased 36% student participation in the annual robotics competition.
- Designed an immersive VR experience by applying empathy mapping and accessibility guidelines for a pediatric radiology client by prototyping in Figma and developing it in Unreal Engine, leading to a measurable drop in parent anxiety and increased understanding of medical techniques involved in the process.

UI/UX Designer | Tata Consultancy Services, India | Full-time

Jul 2021 - Jul 2023

- Enhanced complex datasets into interactive dashboards for the Governance and Analytics vertical using data visualization principles and cognitive psychology to enhance usability by ideating in Figma, Adobe XD, and SQL integration mapping, this accelerated executive response by reducing time-to-decision by 60%.
- Led a team to craft a unified design system to standardize UI across multiple business units, conducted audits, defined reusable components, and introduced quality guidelines via atomic design methodology that increased design consistency and efficiency while reduced rework across products.
- Designed flyers and UI assets for the company's ERP, applying brand-consistent, narrative design and user-focused layout principles, campaign boosted employee awareness and engagement by 25%.

UX & Product Designer | Faclon Labs, India | Internship

Jan 2021 – Apr 2021

- Produced a user-friendly IoT tracking dashboard for clients managing smart devices, used Adobe XD and Illustrator to create clean, intuitive UI assets based on user-oriented design principles, increasing client awareness and contributing to notable business growth, client adaptability and satisfaction.
- Built marketing and visual assets for web and social media, including landing pages, banners, icons, and graphics, using visual hierarchy and brand consistency, in Adobe XD and Illustrator leveraging 47% increase in engagement across digital channels.
