

Summary

Experienced and detail-oriented **Senior .NET Developer** with over 9 years of hands-on experience building and maintaining scalable, responsive web applications. Skilled in both front-end and back-end development using technologies such as **C#, ASP.NET Core, JavaScript, React**, and **Angular**. Strong understanding of software architecture, database design, and modern development practices. Known for writing clean, maintainable code and delivering reliable, high-performance solutions. Collaborates effectively in **Agile** teams, translating business requirements into practical, user-focused software that meets both technical and organizational goals.

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, C/C++/C#, Java, Python, PHP, Node.js, Go
- **Front-End:** React, Angular, Vue, Next.js, Nest.js, MobX, EmotionJS, Nuxt.js, Svelte, Bootstrap, Tailwind CSS, SASS, Jest, Mocha, Chai
- **Back-End:** ASP.NET, .NET, ASP.NET MVC, ASP.NET CORE, Entity framework, Express.js, Next.js, Laravel, Django
- **Database:** MySQL, MongoDB, PostgreSQL, Oracle, MS SQL, Redis, GraphQL
- **Cloud & DevOps:** AWS (EC2, S3, Lambda RDS) Azure, Docker, Kubernetes, Jenkins, RabbitMQ, Kafka, CI/CD, Terraform
- **Methodologies:** Agile, Scrum, Kanban, Test-Driven Development (TDD), Microservices
- **Tools:** Jira, Confluence, Webpack, Babel, Postman, D3.js
- **Version Control:** Git/GitHub/GitLab/BitBucket, SVN
- **AI & ML:** TensorFlow, PyTorch, Keras, Theano, Caffe, Scikit-learn, OpenAI

Professional Experience

Stealth Startup Software Engineer

Los Angeles, CA
08/2025 - 10/2025

- Translated business requirements into effective solutions by developing applications with **ASP.NET Core, React.js, TypeScript**, and **GraphQL**.
- Guided the creation of a cloud-native microservices platform on **Azure**, utilizing **ASP.NET Core, Docker**, and **Kubernetes** to achieve 99.99% uptime while processing over 2 million transactions daily with sub-200ms response times.
- Integrated **OpenAI** models within an AI-powered proposal generation platform, leveraging **ASP.NET** and **Azure** to streamline workflows.
- Optimized **ASP.NET API** response times by 50% through effective database and caching strategies involving **Redis**.
- Designed automated **CI/CD** pipelines with Jenkins and **Azure DevOps**, enhancing deployment reliability by reducing failures by 95% and enabling daily releases.
- Implemented a **Redis-based** caching strategy with **CDN** enhancements, alleviating database load by 85% and improving peak traffic performance.
- Managed the development of a real-time data analytics pipeline using **Apache Kafka** and **Spark** to process over 50TB of data daily, resulting in a 40% increase in user engagement and generating an additional \$2M in revenue.
- Spearheaded API integration through **RESTful** services, leading to a 30% improvement in customer satisfaction.
- Secured systems by adopting **OAuth 2.0** and **JWT** protocols, safeguarding over \$100M in annual transactions.
- Accelerated the migration of legacy systems to a microservices architecture on **Azure**, drastically reducing deployment times from hours to minutes.
- Enhanced team productivity and agile performance, increasing sprint velocity by 35% and mentoring developers to achieve a 25% productivity boost while reducing onboarding time by 40%.
- Achieved a 40% improvement in website performance and load times by optimizing server and application configurations.
- Lowered infrastructure costs by 30% through designing a serverless architecture using **AWS Lambda**.

Wellth Backend Engineer

Remote, US
02/2024 - 08/2025

- Contributed to feature rollouts by developing web applications using **ASP.NET, React**, and **TypeScript**, which enhanced product usability.
- Engineered a highly scalable e-commerce platform with **ASP.NET Core** and **Angular**, supporting a tenfold increase in user traffic while maintaining sub-second page load times.
- Optimized **SQL Server** database queries, achieving a 75% reduction in response times for over 10 million transactions daily.
- Developed dynamic, mobile-friendly applications using **ASP.NET Core MVC, React, Angular**, and **TypeScript**, ensuring responsive and engaging user experiences.
- Implemented a robust **API** security framework featuring rate limiting and monitoring tools, successfully reducing unauthorized access incidents by 90%.

- Introduced dynamic externalized configuration for **CPRS** to facilitate easy updates without code changes, improving operational efficiency.
- Maintained high code quality through unit testing using **Jest**, **Mocha**, and **Chai**; ensured 508 compliance and mentored junior developers.
- Created a custom analytics dashboard with **D3.js** and **React**, offering clients enhanced insights through interactive visualizations.
- Collaborated in an **Agile** environment, employing **Jira** for project management and using **GitHub** Action pipelines and **Jenkins** for seamless integration and deployment.
- Followed common security practices and development design patterns to build secure, reliable code.

Unstoppable Domains

Austin, TX

Full Stack Developer

10/2022 - 10/2023

- Built a warehouse management system called **PopCapacity** using **ASP.NET**, **Angular**, **TypeScript** and **GraphQL**.
- Developed **Green Rabbit**, a **blockchain**-based game that utilizes non-fungible tokens (NFTs) and runs on the **WAX blockchain**.
- Architected and implemented a microservices infrastructure on **AWS** that improved system scalability and resulted in a 50% reduction in server costs.
- Participated in code reviews and adhered to best practices, ensuring high-quality code and helping to reduce bugs by 25%.

OCTI, INC

Huntsville, AL

Software Engineer

09/2020 - 10/2022

- Contributed in the development of web applications using **React**, **TypeScript** and **.Net**, contributing to feature rollouts that improved product usability
- Collaborated closely with cross-functional teams, integrating front-end **Angular** components with back-end **ASP.NET** microservices to provide seamless user experiences
- Optimized existing APIs and built new **RESTful** services using **ASP.NET**, **Entity Framework** and **Hibernate**, reducing response times by 30% and enhancing overall system performance
- Added several features such as a 3rd party API integration for gathering data, location search and filter functions, Payment (**Stripe**, **PAYPAL**), auto report generator, portfolio manager system etc.
- Partnered with **UX/UI** designers to create pixel-perfect, responsive interfaces optimized for **SEO** and page speed, achieving top Google Lighthouse scores.
- Monitored application performance using **Azure Monitor** and worked with the team to resolve incidents quickly to meet SLA requirements
- Improved website performance with a 40% reduction in page load times and streamlined deployment processes with **CI/CD** pipelines, cutting deployment time by 70%.

Age of Learning, Inc

San Diego, CA

Software engineer

4/2019 - 09/2020

- Designed and developed backend schemas and queries for a **GraphQL** microservice, ensuring efficient data retrieval and scalability.
- Created a customer-facing micro-frontend web application using **React**, **TypeScript**, **Recoil**, and **Redux-Saga** to deliver a dynamic user experience.
- Built responsive UI components and reusable elements that maintained design consistency through **Material-UI (MUI)**.
- Leveraged **ASP.NET Core**, **Angular**, and **PostgreSQL** to develop full-stack applications that support internal tools for over 500 employees.
- Migrated legacy systems to modern microservices architecture, enhancing system performance by 60%.
- Assisted in debugging and troubleshooting issues related to cross-browser compatibility.

JNR incorporated

Irvine, CA

Software engineer

10/2018 - 04/2019

- Helped create some backend schemas and queries for a **GraphQL** service.
- Worked on a small web app using **React**, **TypeScript**, **Recoil**, and **Redux-Saga**.
- Made some UI components with **Material-UI** and tried to keep the design similar.
- Helped develop a few applications using **ASP.NET Core**, **Angular**, and **PostgreSQL** for internal use.
- Helped with moving some old systems to newer ones.
- Helped find and fix some browser issues.

Summary

University of California, Davis

Bachelor of Science (Computer Science)

09/2014 - 06/2017
