Farmington Hills, MI • +1-313-358-5290 • Jad.n.chahine@gmail.com • <https://www.linkedin.com/in/jad-chahine-31951415a/>

Skilled IT Analyst with 3 years of experience in IT support, system automation, and infrastructure management. Proficient in PowerShell, Active Directory, Azure, and SharePoint, with a strong focus on improving workflows, security, and user experience. Experienced in troubleshooting issues across Microsoft and Apple environments. Additionally, skilled in full-stack web development using React, Node.js, Express, and MongoDB, with projects like an e-commerce platform and interactive web applications. Committed to delivering high-quality support and applying ITIL best practices.

PROFESSIONAL EXPERIENCE

Shift Digital, Birmingham, MI

2024 – Present

Help Desk Technician I

- Managed user onboarding and offboarding processes via Salesforce, Microsoft Admin Center, Microsoft Exchange Center and Azure.
- Administered account management tasks in SharePoint, ensuring proper permissions and access.
- Developed and executed PowerShell macros for efficient user onboarding and offboarding.
- Provided remote technical support to end-users using TeamViewer and GoToAssist, resolving software and hardware issues.
- Automated user onboarding in Azure using PowerShell scripts including mailbox creation, license assignment and group management (Intune, ect.).
- Monitored and mitigated phishing threats using Microsoft Defender's Threat Explorer.
- Applied advanced troubleshooting methods to resolve technical issues across both Microsoft and Apple operating systems.

BorgWarner, Auburn Hills, MI

2022 – 2024

IT Analyst Intern

- Ensured our contracting company DXC follows the correct procedures when troubleshooting with end users, verifying that they adhere to ITIL (IT Infrastructure Library) standards for service desk support.
- Managed 3rd party contractor accounts and permissions through Active Directory, ensuring secure and controlled access.
- Create and publish Knowledge Articles for common issues and contacts, providing end users and service desk agents with access to quality information for troubleshooting
- Use PowerShell scripts to automate tasks such as setting MFA phone numbers, getting unique user information, and syncing accounts to Azure, reducing manual workload and potential errors.
- Create and manage VPN groups in Active Directory, ensuring secure access to network resources for authorized users.
- Ensure that all procedures and processes adhere to the ITIL framework, promoting best practices in IT service management

EDUCATION

Wayne State University, Detroit, MI

2024

Bachelor of Science, Computer Science

SKILLS & OTHER

Skills: PowerShell, Active Directory, HTML, JavaScript, SQL, Routing protocol, React Framework, Salesforce, Bash, Linux, Microsoft Tools, Python

Projects

- Smoothie Shop Website: (React, Node.js, MongoDB, HTML, CSS, JavaScript) Designed and implemented a website for a smoothie shop using React for the front end, Node.js for the server, and MongoDB for the login page, demonstrating full-stack development skills.
- E-commerce Shopping Cart and Checkout (React, Express, HTML, CSS, JavaScript, Stripe) Built a complete e-commerce platform with a shopping cart and checkout functionality using React for the front end and an Express server for the back end, integrated with Stripe for payment processing.
