SUMMARY

- Business Analyst with 7 years of experience optimizing business processes, managing data integration, and driving efficiency across healthcare, technology, and supply chain sectors.
- Proficient in Agile methodologies, Lean Six Sigma, and data analysis tools such as Power BI, Tableau, SQL, and Python to deliver actionable insights and process improvements.
- Expertise in business analysis & documentation, including requirement gathering, business case development, gap analysis, and use case development.
- Skilled in developing and implementing data-driven solutions, enhancing system performance, and ensuring seamless integration of technologies like Microsoft Dynamics 365, Snowflake, and AWS.
- Experienced in working with cross-functional teams to identify inefficiencies, optimize workflows, and implement process reengineering initiatives.
- Adept at facilitating system upgrades and ensuring minimal disruption through effective change management and risk management strategies.
- Strong collaboration and communication skills with the ability to engage stakeholders at all levels and drive change within organizations.

SKILLS

- **Business Analysis & Documentation:** Requirement Gathering, BRD, FRD, Use Case Development, Process Modelling (BPMN), Workflow Design, User Stories, Gap Analysis, Impact Analysis, Business Case Development
- **Data Analysis & Visualization:** Power BI, Tableau, Looker, Advanced Excel, SQL, Python, R
- **Enterprise Tools:** Jira, Confluence, SAP, Microsoft Dynamics 365, Salesforce CRM
- **Project Management & Methodologies:** Agile, Waterfall, SDLC, Stakeholder Management, Change Management, Risk Management
- **Business Process Improvement:** Root Cause Analysis, Lean Six Sigma, DMAIC, Process Reengineering, Continuous Improvement
- **Soft Skills:** Critical Thinking, Problem-Solving, Communication, Negotiation, Stakeholder Collaboration, Time Management, Presentation Skills
- **Cloud & Integration Tools:** AWS, Google Cloud, Azure, Informatica, Snowflake
- **Data Analysis Techniques:** Data Cleansing, Data Wrangling, Statistical Analysis, Time Series Analysis, A/B Testing
- **Healthcare & Compliance Knowledge:** HIPAA, EMR, EHR, ICD-10, SOX, AML
- **Version Control & Collaboration:** Git, GitHub, Trello, Microsoft Teams, Slack
- **Other Tools:** Microsoft Visio, Lucidchart, ChatGPT

WORK EXPERIENCE

Kaiser Permanente

June 2024 – Present

Business Analyst

- Spearheaded the integration of multiple data sources into a unified platform using AWS and Snowflake, improving patient data access and system interoperability.
- Collaborated with cross-functional teams to identify and address process inefficiencies, utilizing Lean Six Sigma methodologies to streamline workflows and enhance data processing efficiency.
- Applied advanced data analysis techniques, including data cleansing and wrangling, to ensure the accuracy and consistency of patient health records across integrated systems.
- Developed real-time reporting dashboards using Power BI and Tableau, empowering stakeholders with actionable insights and enhancing decision-making in clinical operations.
- Managed the project lifecycle using Agile methodologies, ensuring timely delivery of milestones while adhering to strict HIPAA compliance and healthcare regulations, reducing data processing time by 15%.

Kaiser Permanente

January 2024 – April 2024

Business Analyst – Intern

- Assisted in gathering requirements and developing use cases to improve patient scheduling efficiency, reducing wait times and increasing patient throughput.
- Utilized Power BI and Tableau to create data visualization reports, analysing scheduling patterns and helping stakeholders identify areas for optimization.
- Contributed to the integration of Microsoft Dynamics 365 to streamline appointment booking processes, ensuring seamless data flow across departments and reducing system errors.

Dell Technologies

July 2018 – December 2022

Business Analyst

- Managed the ERP system upgrade, optimizing system capabilities, refining business processes, and incorporating advanced analytics for improved decision-making.
- Worked closely with cross-functional teams to define system requirements and ensure the ERP system aligned with business needs, enhancing efficiency across finance, procurement, and supply chain management.
- Employed Agile practices to oversee project milestones and deliverables, guaranteeing steady progress and on-time implementation.
- Performed data analysis using Tableau and Power BI to uncover performance bottlenecks and inefficiencies, resulting in optimized workflows post-upgrade.

- Generated and updated reports and dashboards to monitor key performance indicators, allowing stakeholders to make well-informed, data-backed decisions.
- Participated in migrating data from legacy systems to SAP, ensuring smooth transition and minimal disruption to daily business processes.
- Executed data cleansing and wrangling procedures to guarantee the accuracy and consistency of post-migration data.
- Handled risk and change management processes to mitigate system downtime during the upgrade, facilitating a smooth transition for end-users.
- Organized and delivered training sessions for end-users on the upgraded system, ensuring high adoption and improved usage of new features, leading to a 20% increase in system efficiency.

VMware

January 2017 – June 2018

Business Analyst Intern

- Initiated performance improvements in VMware's desktop virtualization environment, optimizing application delivery and enhancing user productivity.
- Carried out gap analysis to uncover inefficiencies in the current end-user computing system, offering targeted recommendations for optimization.
- Compiled thorough business cases for system upgrades, including detailed cost-benefit analysis, to support executive decisions and ensure project financing.
- Collaborated with stakeholders to gather requirements and translate them into clear, actionable project documentation using Waterfall methodology.
- Coordinated with IT teams to optimize VMware's virtualization systems, ensuring greater system reliability and minimizing downtime for end-users.
- Used advanced Excel and Power BI to construct performance dashboards, enabling real-time analysis and visualization of end-user computing performance.
- Identified root causes of productivity problems for end-users, implementing solutions to improve and streamline workflows.
- Supported the integration of Microsoft Dynamics 365 to enhance service delivery, automate workflows, and improve user experience across departments.
- Worked alongside cross-functional teams to ensure smooth system integration, minimizing disruptions and ensuring a smooth transition for end-users, improving system performance by 15%.

PROJECTS

Sales and Marketing Dashboard Automation

- Automated sales and marketing dashboards using Tableau to provide real-time insights into sales trends and customer behaviours.
- Integrated data from Salesforce CRM and other business tools to track marketing campaigns and evaluate ROI.
- Provided recommendations for campaign optimizations to improve marketing efficiency.

Customer Experience Enhancement Platform

- Managed the development of a customer-facing platform to enhance support processes, utilizing customer data insights to personalize experiences.
- Integrated chatbot technology and automated workflows using Microsoft Dynamics 365 to improve customer interactions.
- Conducted A/B testing and statistical analysis on platform usage to continually improve service features and increase customer satisfaction.

EDUCATION

Master of Science in Analytics and Systems

University of Bridgeport, Connecticut, USA | GPA: 3.9

January 2023 – April 2024

Bachelor of Commerce in Computer Applications

Osmania University, Hyderabad, India | GPA: 3.0

July 2015 – April 2018
