

JORDON CELESTINE

Senior Full Stack Developer | AI & ML Expertise | Scalable Architectures

(805) 464 7239 • j.celestine116@gmail.com • linkedin.com/in/jordon-celestine • Atascadero, CA

Summary

Senior Full Stack Developer with over 9 years of web development experience. Led a \$100K research project recognized as the "silver standard" by the client. Proficient in front-end and back-end technologies, leading cross-functional teams of up to 10 members. Advanced skills in ML and AI, enhancing application functionalities and a 25% boost in business growth.

SKILLS

Languages: Python · JavaScript · TypeScript · C# · Java · Go · HTML · CSS · SQL · Bash

Frameworks: React · Angular 2+ · Vue · Django · Flask · FastAPI · Node.js · Express.js · Next.js · TensorFlow · NumPy

Databases: MySQL · PostgreSQL · MongoDB · SQLite · Redis · Elasticsearch · Oracle Database · GraphQL · NoSQL

DevOps & Development:

Docker · Kubernetes · Agile · CI/CD · Git/GitHub/GitLab · Jira/ClickUp · GCP · AWS · Azure · Celery/Redis · OAuth

EXPERIENCE

PNC Bank

Fremont, CA

Senior Full Stack Developer

10/2023 - 01/2025

- Led architecture design and development of enterprise-level web applications using modern technologies such as **React.js**, **Angular**, **Node.js**, and **Python/Django**.
- Implemented a scalable user authorization stack using **Redis** and **Scylla** and a distributed user feed and notification subsystem using **RabbitMQ**.
- Applied **GraphQL** APIs to enhance data querying capabilities, reducing data transfer times by 30% and improving client-side performance.
- Designed and executed a scalable **microservice architecture** leveraging **Docker** and **Kubernetes**, which enhanced system reliability and reduced deployment times by 50%.
- Integrated **machine learning** models into applications for predictive analytics and personalized user experiences using **TensorFlow.js**, increasing user engagement metrics by 25%.
- Achieved 80% accuracy in sentiment analysis tasks and 85% accuracy in image recognition tasks through model fine-tuning and optimization.
- Supported **Agile** methodologies and conducted sprint planning, retrospectives, and daily stand-ups, improving team collaboration and productivity by 30%.
- **Mentored** junior developers in best practices, code reviews, and software architecture, fostering a culture of continuous learning and professional growth.

EXPERIENCE

Citi Bank

Los Angeles, CA

Full Stack Developer

06/2021 - 09/2023

- Administered front-end designs based on wireframes and mockups provided by UX/UI designers, ensuring pixel-perfect implementation and adherence to design guidelines.
- Optimized user interfaces for performance and responsiveness, achieving a 50% reduction in page load times through code optimization and **lazy loading** techniques.
- Integrated state management libraries such as **Redux** and **NgRx** to manage complex application states efficiently, reducing state-related bugs by 25%.
- Constructed visually stunning frontends with **Tailwind CSS** from Figma designs, resulting in a 35% increase in user retention and satisfaction.
- Carried out advanced **SEO** strategies to enhance search engine visibility and ensure compliance with accessibility standards, resulting in a significant 30% surge in organic traffic.
- Maintained code quality through code reviews and automated testing using tools like **Jest** and **Enzyme**, achieving 80% test coverage and reducing regression issues by 30%.

CloudWave Technology

San Francisco, CA

Full Stack Developer

01/2019 - 05/2021

- Redesigned the **React.js** frontend to meet updated design standards, achieving a 30% increase in user engagement.
- Engineered and sustained the backend infrastructure using **Django**, managing over 100,000 user requests daily.
- Managed **AWS** infrastructure, including **EC2** and **S3**, resulting in 99.9% uptime and scalable resource management.
- Applied caching strategies with **Redis**, significantly improving data retrieval speed by 50%.
- Contributed to the 'Seafire-Haiwen' **open-source** project by developing new features using **React** and **Django**, which improved user experience and system performance.

Fidelity Investments

San Francisco, CA

Junior Web Developer

06/2016 - 12/2018

- Implemented **RESTful APIs** and integrated third-party services to enhance application functionality and performance by 25%.
- Created reusable components and libraries in **React.js** and **Angular**, enhancing code reusability and decreasing development time by 30%.
- Preprocessed and cleaned datasets with **Pandas** and **NumPy**, ensuring data quality for **model training** and achieving a 90% accuracy rate in data preprocessing.
- Reduced deployment time by 50% by automating build and deployment processes using **Jenkins** and **Ansible**.

Education

University of California

Bachelor's degree, Computer Science

09/2014 - 05/2016

Mt. San Jacinto College

Associate's degree, Mathematics and Computer Science

09/2012 - 06/2014
