+1 (572) 220-7379

Ohio, USA

Over 7 years of Professional experience as Software Engineer (Java) in Designing and Developing robust software solutions. Expertise in building scalable, high-performance microservices using Advanced Java, Spring Boot, Hibernate and Maven. Skilled in optimizing RESTful APIs, integrating cloud-based solutions, deploying services in Azure and adhering to best practices in security and software design principles. Adept at driving agile software development life cycles and collaborating with cross-functional teams to deliver resilient, high-quality and timely solutions.

## **SKILLS**

**Technology and Tools:** Java, Spring Boot, Rest API, Active MQ, Apache camel, JMS, Junit, Mockito, Oracle, MS SQL, MYSQL, JDBC, Hibernate, Azure, Kubernetes, Git repository, Eureka, Prometheus, Kibana, GitHub Actions, Jira

## **WORK EXPERIENCE**

### **Infosys**

#### *Technology Lead – Image Builder Application for FedEx*

09/2024 – Current

Pune, India

- Engineered microservice architecture to read files from windows cloud server, extract text from images using Tesseract OCR and deliver final product using SFTP.
- Implemented Spring Security using Oauth2 token and Role based authorization.
- Used Eureka as a service discovery tool to register instances from Windows Cloud servers.
- Managed to reduce database load by 25% using Redis cache and connection pooling.

#### *Process Analyst - Document Migration Application for FedEx*

09/2022 – 09/2024

London, UK

- Developed scalable scheduler-based backend microservices to trigger Document extraction process leveraging AWS S3 for storing documents.
- Built async communication with downstream services using Apache camel.
- Automated build and deployment processes using Kubernetes, decreasing deployment time by 30%
- Integrated CI/CD pipelines like Jenkins, GitHub Actions, accelerating release cycles by 60%.

#### *Technology Analyst - Service Disruption Application for FedEx*

02/2021 – 08/2022

Pune, India

- Participated in agile development sprints, improving project delivery timelines by 20%
- Designed REST APIs for the functionality to enforce the disruption on consignment.
- Optimized SQL queries using Pagination with Spring JPA, resulted in a 30% reduction in database query times.
- Integrated actuators for health check and Kibana for log analysis, reducing error detection times by 20%.

### **Cognizant Technology Solutions**

#### *Associate – Blue Owl Insurance Application*

11/2017 – 01/2021

Kolkata, India

- Developed the Claim functionality for insurance policies using spring web services.
- Fixed security vulnerabilities and issues of SonarQube, boosting overall code quality by 20%.
- Involved in troubleshooting and fix production issues.
- Created unit and integration test cases using Junit, Mockito, increasing code coverage to 85%.

## **EDUCATION**

VIIT- Bachelor's of Engineering, Computer Engineering

2014 - 2017

Pune, India
