929-233-9854

Corona, CA

Senior Golang Full Stack Developer with **6+** years of experience designing and building scalable, high-performance backend systems and microservices. Proficient in **Go, Svelte, React.js and REST/gRPC APIs**, concurrency patterns, and event-driven architectures. Skilled in **Docker, Kubernetes**, and **cloud platforms (AWS, GCP, Azure)** with strong expertise in CI/CD, testing, and performance optimization. Adept at collaborating in Agile teams and mentoring developers to deliver secure, reliable, and efficient software solutions.

Work Experience

Senior Full Stack Developer

Kirusoft

12/2023 - Present

- Designed and developed **high-performance microservices** in Go, handling **millions of transactions daily** with 99.99% uptime.
- Built scalable **RESTful** and **gRPC APIs** for distributed systems, reducing latency by **35%**.
- Implemented **concurrency patterns (goroutines, channels, worker pools)** to improve processing throughput by **50%**.
- Optimized PostgreSQL queries and introduced **Redis/Memcached caching**, cutting response times by **40%**.
- Deployed containerized applications using **Docker and Kubernetes** with CI/CD pipelines on Jenkins and GitHub Actions.
- Collaborated with frontend teams (**Svelte, React, Angular**) to deliver end-to-end features.
- Mentored junior developers on **Go best practices, testing (GoMock, Testify)**, and **clean architecture** principles.
- Applied **Redux state management** in the main app, reducing state-related bugs by **50%**.
- Built and optimized RESTful and **GraphQL APIs**, integrating third-party services including **Stripe, Twilio**, and **SendGrid** for seamless payments and notifications.
- Collaborated with cross-functional teams to deliver features aligned with client business goals, achieving a **15%** client satisfaction score increase.
- Improved application security with **JWT/OAuth2** authentication, HTTPS/TLS enforcement, and vulnerability testing, reducing incidents by **25%**.
- Conducted technical workshops for cross-departmental knowledge sharing, fostering a culture of continuous learning and innovation.

Senior Software Developer

The University of Texas at Austin

04/2024 - 08/2025

- Developed backend services in Go to support a **real-time payment processing system**, ensuring PCI DSS compliance.
- Applied **event-driven architecture** using **Kafka** and **RabbitMQ**, improving system scalability.
- Built **unit, integration, and load testing suites** to achieve **90%+ code coverage**.
- Integrated third-party APIs (**Stripe, Plaid, Twilio**) into core applications.
- Improved CI/CD pipelines with automated builds, tests, and deployments in **AWS (ECS, Lambda, S3)**.
- Contributed to open-source projects related to mobile development frameworks, showcasing thought leadership within the developer community.
- Reduced infrastructure costs by **\$200K** annually through strategic cloud resource allocation on **AWS** services.
- Spearheaded initiatives to enhance application security posture through regular vulnerability assessments and threat modeling exercises.

Software Developer

Association of American Geographers

01/2022 - 11/2023

- Upgraded robust backend systems using **Golang** that processed over 100M transactions annually for e-commerce platforms.
- Refactored single-page applications with **Svelte, React.js** and **Vue.js**, reducing page load time by **35%** and increasing UI responsiveness.

- Engineered scalable serverless applications on **AWS Lambda** to handle dynamic workloads efficiently without compromising performance.
- Led the optimization of **SQL databases** through indexing and **query tuning techniques**, reducing query execution time by up to 70%.
- Enhanced system security by implementing role-based access control (**RBAC**) and conducting regular **security audits**.
- Collaborated in **Agile/Scrum teams**, contributing to sprint planning, **backlog grooming**, and daily standups.
- Deployed applications to **Heroku** and **AWS**, supporting continuous delivery and scaling.

UI/UX Software Engineer

Charter Communications

09/2020 - 12/2021

- Redesigned user interfaces to enhance usability, resulting in a **20% increase** in customer satisfaction scores.
- Closely worked with stakeholders to define user experience requirements, reducing onboarding time by **15%**.
- Implemented **responsive designs** ensuring accessibility across all devices, boosting mobile traffic by **18%**.
- **Modernized** real-time dashboards with **React**, **Redux**, and **D3.js**, enabling real-time data visualization for enterprise clients.
- Deployments using **Docker** Compose and **Kubernetes**, cutting environment setup time from days to hours.

Web Developer

Mayo Clinic

03/2019 - 03/2020

- Designed customer-facing portals using **AngularJS**, **React**, and **Go**, boosting user engagement by **25%**.
- Integrated third-party APIs (**Google Maps**, **PayPal**, **Stripe**) into core products, improving functionality and payment processing reliability.
- Enhanced database performance by migrating from **MySQL** to **PostgreSQL** and introducing indexing and query optimization, reducing query times by **60%**.
- Partnered with DevOps to establish **CI/CD pipelines** with **Jenkins**, ensuring fast and reliable deployments.
- Worked closely with UX teams to deliver responsive, mobile-first designs aligned with modern accessibility standards (**WCAG**, **ARIA**).

Web Developer

Capital One

01/2018 - 02/2019

- Designed customer-facing portals using **AngularJS**, **React**, and **Go**, boosting user engagement by **25%**.
- Integrated third-party APIs (**Google Maps**, **PayPal**, **Stripe**) into core products, improving functionality and payment processing reliability.
- Enhanced database performance by migrating from **MySQL** to **PostgreSQL** and introducing indexing and query optimization, reducing query times by **60%**.
- Partnered with DevOps to establish **CI/CD pipelines** with **Jenkins**, ensuring fast and reliable deployments.
- Worked closely with UX teams to deliver responsive, mobile-first designs aligned with modern accessibility standards (**WCAG**, **ARIA**).

Engineer Intern

Google

03/2016 - 05/2017

- Designed customer-facing portals using **AngularJS**, **React**, and **Go**, boosting user engagement by **25%**.
- Integrated third-party APIs (**Google Maps**, **PayPal**, **Stripe**) into core products, improving functionality and payment processing reliability.
- Enhanced database performance by migrating from **MySQL** to **PostgreSQL** and introducing indexing and query optimization, reducing query times by **60%**.
- Partnered with DevOps to establish **CI/CD pipelines** with **Jenkins**, ensuring fast and reliable deployments.
- Worked closely with UX teams to deliver responsive, mobile-first designs aligned with modern accessibility standards (**WCAG**, **ARIA**).

Core Skills

Frontend: HTML, CSS, JavaScript, React.js, Angular, Vue.js, Next.js, Bootstrap, Tailwind, Sass, Material UI, Ant Design, Redux, Mobx

Backend: Go (Golang), Python, Java, C#, Django, Spring Boot, ASP.NET, gRPC, RESTful APIs

Database: MySQL, MongoDB, PostgreSQL, MariaDB, MS SQL Server, Oracle DB, Redis, DynamoDB

Cloud Platforms & DevOps: AWS (EC2, S3, Lambda, RDS), GCP, Azure, Docker, Kubernetes, GitLab CI/CD, Jenkins, GitHub Actions

Methodologies: Agile, Scrum, Kanban, Test-Driven Development (TDD)

System Design & Architecture: Microservices, Monoliths - Modularization, Event-driven systems (Kafka, RabbitMQ, NATS), Load balancing, caching (Redis, Memcached, CDN)

AI & ML: TensorFlow, PyTorch, Keras, Theano, Caffe, OpenAI, AI/ML integration (embedding models, LLM APIs)

Education

Boston University

Master's Degree in Computer Science

2018-2020
