EDUCATION

University of Louisville, J.B. Speed School of Engineering

- **Master of Engineering in Computer Science & Engineering** (*In Progress*)
 - **Bachelor of Science in Computer Science & Engineering** (*May 2021*)
-

TECHNICAL SKILLS

Programming Languages & Frameworks:

- C#, C, C++, Java, Python, VB.NET, JavaScript, Typescript, x86 ASM
- VHDL (VHSIC Hardware Description Language)
- HTML, CSS (SASS, LESS)
- XML, JSON
- Angular, jQuery, Node.js
- Blazor, Razor Pages, ASP.NET, .NET, .NET Framework, .NET Core
- REST API & gRPC
- Xamarin, WPF

Development Practices & Architectures:

- SOLID Design Principles
- OOP concepts and design patterns
- MVC, SPA (Single Page Applications)
- Microservices Architecture
- Event-Driven Systems
- CI/CD (Continuous Integration / Continuous Deployment)
- API Security

Databases & Data Management:

- MSSQL, T-SQL, MySQL, Relational Database
- EF Core / Entity Framework, Dapper
- ETL (Extract, Transform, Load)

Tools:

- Git CLI, Azure DevOps
 - Batch Scripting, Bash, PowerShell
 - Visual Studio, Visual Studio Code, IIS Express
 - Scrum, Agile, SAFe
-

WORK EXPERIENCE

Enclara Pharmacia — Software Engineer

May 2022 – December 2024

- Developed full-stack solutions as part of an Agile Scrum team, improving internal software products.
- Enhanced compliance in prescribing software using **C# WPF**.
- Maintained and improved user management systems with **C#, Blazor, and Razor Pages**.
- Upgraded **C# ASP.NET APIs**, contributing to a major framework rewrite from .NET Framework 4.8 to .NET 8, unit testing, and **gRPC** implementation.
- Managed and optimized relational databases with **Microsoft SQL Server**.

Independent Contract Work — *Frontend Software Engineer*
June 2021 – November 2021

- Designed and built a prototype web application and database for public data collection.

Kindred Healthcare — *Software Engineer Student Co-op*
January 2019 – December 2020

- Developed and maintained internal web applications using **Angular and C# .NET Core**.
 - Provided support for legacy systems built on **C# .NET Framework**.
 - Integrated a templating engine into an intranet microservice using Puppeteer to control Google Chrome.
 - Worked on an iOS application to collect feedback from customers, including backend, database, and admin dashboard using Angular.
-

PROJECTS & APPLIED EXPERIENCE

- **C/C++:** Developed a **3D tic-tac-toe game** with a classmate.
 - **Java:** Built an **address book and simple calculator** using object-oriented programming principles.
 - **C/ASM:** Experimented with **recreating the Meltdown CPU memory exploit**.
 - **SQL:** Applied relational database normalization techniques.
 - **Python:** Conducted **sentiment analysis on public API data**.
 - **C#:** Created an **API Template** using **MVC design** and **Entity Framework**, developed a **Unity game**, and implemented a **palindrome detection algorithm**.
-

COURSEWORK & SPECIALIZED TRAINING

- **Cyber Security & Quantum Computing**
- **Simulation & Modeling of Discrete Systems**
- **Game Development with Unity**
- **Advanced Computer Hardware Maintenance**
- **FPGA Development**
- **Data Mining**
- **Embedded Systems**
