Education

UC Davis – MS, Electrical and Computer Engineering

Yale University – BA, Economics

Experience

Staff Software Engineer – Murmuration, NYC (remote)

1/2023 – Present

- **Mobile Tech Lead** overseeing architecture and development across iOS (SwiftUI, CoreData, Swift Concurrency), Android, and API (Node.js/AWS). Delivered major features including Canvassing, Surveys, and Phone Banking. Implemented CI/CD pipelines (Xcode Cloud), unit/UI tests, and Firebase Analytics and Crashlytics crash reporting.
- **Project Tech Lead** for Canvassing and Survey functionality, integral to the broader platform, spanning mobile, web, and backend. Architected and implemented backend, AWS services, and iOS app (SwiftUI) from concept to launch. Led a team that grew from 3 to 8 engineers, providing mentorship and technical guidance while collaborating with Product and Design on requirements and UX.

Senior iOS Engineer – Helm (formerly Organizer/Crowdskout), D.C. (remote)

10/2019 – 12/2022

- Refactored and enhanced **Organizer Canvassing**, an iOS app (Swift/UIKit) for field organizers.
- Architected and developed **Civically**, an iOS app (Swift/UIKit) and backend system (Node.js) for sharing and managing volunteer opportunities.

iOS Specialist – Seatninja, Roseville, CA

1/2019 – 7/2019

- Implemented new features for **Seatninja** restaurant management iOS app (Swift/UIKit) used for reservations, seating, and server rotation.
- Created a JavaScript library enabling third-party sites to embed reservation functionality.
- Enhanced the .NET backend API and admin web apps.

iOS Engineer – Barrick Gold, Henderson, NV (remote, contract – Anderson Solutions Group)

10/2018 – 12/2018

- Developed iOS app (Swift/UIKit) used by miners to assign/track underground equipment and tasks.

Software Engineer – CalRecycle, Sacramento, CA (contractor - LinkOne)

2/2016 – 9/2018

- Built public-facing **Waste Tires Management System (WTMS)** and **Grants Management Systems (GMS)** using ASP.NET MVC, LINQ to Entities, EF, jQuery, Telerik Kendo, and Bootstrap.

Lead iOS Developer – Rowy Networks, Sacramento, CA

9/2013 – 12/2015

- Architected and developed **Livestock Identification (LID)** iOS app (Objective-C/UIKit) used by California (CDFA) and Washington (WSDA) inspectors for brand inspections and movement permits.
- Architected and co-developed the .NET/SQL Server backend and API.

iOS Developer – Shafer Systems, Flower Mound, TX (remote)

12/2012 – 12/2013

- Developed **Google QuickOffice** for iOS for its initial release and refactored the font manager.
- Developed **MyRedLines**, an iOS construction app with shared blueprint annotation and task tracking.
