

## CAREER SUMMARY

### QA Automation Tester

Results-driven Detail-oriented and highly skilled QA Automation Tester with 9+ years of progressive experience in designing, developing, and executing automated test frameworks across web, mobile, and API platforms. Proven track record in utilizing Selenium WebDriver, TestNG, Cucumber, Playwright, Appium, and Postman to ensure top-quality software delivery. Expertise in agile methodologies, CI/CD integration, cross-browser testing, and cloud platforms like Sauce Labs. Adept at identifying and resolving bugs efficiently to enhance product performance and user satisfaction. Strong analytical, communication, and collaborative skills, contributing to high-performing QA teams.

## AREAS OF EXPERTISE

- **Automation Tools:** Selenium WebDriver, Selenium Grid, Selenium IDE, TestNG, JUnit, Cucumber, Playwright (UI/API), Appium
- **API Testing:** POSTMAN, SoapUI
- **Mobile Testing:** Android Studio, Appium
- **CI/CD Tools:** Jenkins, Git, GitHub
- **Frameworks:** BDD, TDD, Hybrid, Data-driven
- **Bug Tracking Tools:** JIRA, Bugzilla
- **Platforms:** Windows, Linux, Android
- **Cloud Testing:** Sauce Labs
- **Languages:** Java, JavaScript, Python (basic)
- **Soft Skills:** Problem-solving, Team collaboration, Attention to detail, Communication, Time management, Adaptability

## PROFESSIONAL EXPERIENCE

### State of New York – USA (Remote)

Senior QA Automation Engineer

Aug 2023 – Present

- Designed and implemented scalable test automation frameworks using Selenium WebDriver, TestNG, and Java for web-based applications.
- Developed and executed Playwright test scripts for both UI and API testing to achieve over 85% automation coverage.
- Automated end-to-end testing of Android mobile applications using Appium and Android Studio.
- Integrated automation suites with Jenkins CI/CD pipelines to enable scheduled test executions and reporting.
- Utilized Sauce Labs for cross-browser and cross-platform testing, reducing manual testing by 70%.
- Collaborated with BAs and Developers in daily standups and sprint planning using Agile methodology.
- Led defect triage meetings and ensured timely resolution of critical bugs in JIRA.
- Performed data validation and backend testing by writing complex SQL queries.

### LPL Financial – India

QA Test Engineer

May 2021 – Apr 2022

- Developed over 300 automated test scripts using Selenium WebDriver, Java, TestNG, and Maven.
- Built a hybrid test automation framework and integrated it with Jenkins and Git for CI/CD.
- Performed REST API automation using Postman collections and Newman CLI for test execution.
- Created feature files and step definitions for BDD automation using Cucumber and Gherkin syntax.
- Analyzed test results, generated detailed test reports, and maintained test logs.
- Conducted exploratory and smoke testing during each release cycle.
- Mentored junior QA team members in automation framework usage and best practices.
- Participated in weekly QA review meetings and documented test strategies and approaches.

## **Genpact – Hyderabad, India**

*Automation Tester*

*Jan 2020 - Apr 2021*

- Automated regression and functional test cases using Selenium WebDriver and TestNG.
- Created and maintained custom reusable Java libraries for enhanced test script management.
- Conducted extensive API testing using SoapUI, validating XML/JSON requests and responses.
- Performed mobile automation for Android apps using Appium integrated with TestNG.
- Carried out version control and code merging using Git and GitHub.
- Generated test execution reports using ExtentReports for better visibility among stakeholders.
- Conducted performance testing of APIs to identify bottlenecks.
- Provided test estimations, coordinated test environments, and participated in sprint retrospectives.

## **Sutherland Global Service – India**

*QA Engineer*

*Jan 2018 – Dec 2019*

- Converted manual test cases to automated scripts using Selenium IDE and later migrated to WebDriver.
- Conducted cross-browser testing on Chrome, Firefox, and Edge using Selenium Grid.
- Utilized JIRA for defect reporting, tracking, and requirement traceability.
- Performed regression, functional, and integration testing for web and mobile platforms.
- Involved in writing SQL queries to validate data integrity between UI and backend.
- Participated in QA planning meetings and reviewed test cases with business analysts.
- Collaborated with development teams during sprint reviews to ensure bug-free product delivery.
- Documented all test artifacts including test cases, bug reports, and test data.

## **ICICI Bank – Hyderabad, India**

*Jr. Manual Test Engineer*

*Sep 2014 – Dec 2017*

- Performed manual testing of banking applications including Loan Management, Customer Onboarding, and Funds Transfer modules.
- Documented test cases, test scenarios, and executed test cycles for multiple projects.
- Logged and verified more than 300 defects using Bugzilla, ensuring accurate documentation and follow-up.
- Participated in test plan reviews and requirement analysis sessions with stakeholders.
- Worked closely with development teams during the UAT phase for final validations.
- Validated UI elements and performed cross-browser functionality checks manually.
- Assisted in drafting user manuals and QA reports for internal audits.

## **EDUCATION**

- Masters in information technology, Hood College, Frederick, MD. 2023
- Bachelors in computer applications, Kakatiya University, India. 2014
