PROFILE SUMMARY

As a Software Engineer with 5+ years of hands-on experience across financial services, edtech, and health tech, I specialize in building and maintaining scalable, high-performance applications. I bring deep expertise in C#, JavaScript/TypeScript, SQL, and cloud infrastructure (Azure, AWS). Recognized for solving complex technical challenges and modernizing legacy systems, I focus on delivering practical solutions that drive real business results. I'm driven by a strong curiosity, high attention to detail, and a relentless commitment to improving systems through efficient, clean code and smart architectural decisions.

TECHNICAL SKILLS

Proficient: C#, ASP.NET, Xunit, TypeScript, JavaScript, React, Next.js, PostgreSQL, MySQL, Kafka, Docker, Linux, Scrum, Clean Architecture, SOLID, Design Patterns, Microservices

Intermediate: AWS, EC2, ECS, Kubernetes, Redis, Angular, Keycloak, NGINX

Beginner: Python, Go, C++, Memcached, MongoDB

PROFESSIONAL EXPERIENCE

Vena Consultoria — *Senior Software Engineer* | 2024 - Present

- Spearheaded the transformation of a financial analysis process from Excel-based workflows to a robust web-based platform, improving efficiency and scalability.
- Led the design and implementation of features for processing financial reports, enhancing financial visibility
- Engineered a self-service data model that cut reliance on external BI tools and decreased data analysis completion time by 60%, leading to a 25% increase in team efficiency.
- Enhanced operational safety by developing autonomous and secure data pipelines.

Ubistart — *Mid-Level Software Engineer Remote* | 2022 - 2024

- Developed and deployed a hospital appointment and doctor management system, increasing operational efficiency.
- Architected and developed a scalable delivery platform using microservices in collaboration with ex-iFood analysts.
- Modernized a legacy teacher assistance system, implementing CI/CD pipelines and performance optimizations.
- Acted as tech lead for an internal system, ensuring on-time delivery and code quality.

Kenzie Academy Brasil — *Software Engineer & Peer Coach* | 2021 – 2022

- Mentored students on front-end technologies (HTML, CSS, JavaScript, ReactJS), improving their coding proficiency.
- Delivered personalized feedback and assessments to support learning and growth.
- Facilitated daily stand-ups and progress tracking to align project delivery with goals.

Freelance — *Software Engineer* | 2020 - 2021

- Maintained and enhanced legacy systems for small businesses.
- Built custom web scraping tools for automotive companies to support market intelligence efforts.

EDUCATION

B.S. in Computer Science (*Expected 2025*)

Estácio de Sá University

Technical Diploma in Software Development (2022)

Kenzie Academy
