

SANTHOSH REDDY MAREPALLI

Software Developer

Birmingham, AL | +1 6599770404 | santhoshreddy9857@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Developer with around 4 years of experience building scalable backend services, intuitive front-end interfaces, and cloud-hosted applications across healthcare and financial domains. Skilled in developing Spring Boot APIs, implementing microservices, optimizing SQL/NoSQL data models, and engineering responsive React.js interfaces that improve user workflows. Hands-on experience deploying applications on AWS and Azure, working with MySQL and MongoDB data stores, and automating build/release pipelines using modern DevOps practices. Known for delivering reliable features in Agile teams, improving service performance, and collaborating closely with product, QA, and architecture groups to ship high-quality, production-ready solutions.

PROFESSIONAL EXPERIENCE

Software Development Engineer | BCBS | AL, USA

September 2025 – Present

- Contributed to creating Java + Spring Boot components for member-eligibility workflows, improving processing capacity for **8K+ daily eligibility checks**.
- Assisted in constructing AWS-based claim-intake flows using API Gateway, Lambda, and SQS by delivering helper modules, API integrations, and validation utilities used across **12+ internal services**.
- Added targeted improvements in request tracing, error-handling, and input validation, reducing recurring claim-processing failures by **over 300 incidents per month**.
- Crafted and refined React.js + TypeScript UI components supporting **150+ internal users** for eligibility lookup and submission.
- Supported Terraform configuration updates and environment provisioning tasks for **4+ dev/test environments**.
- Reviewed SQL queries and applied schema adjustments in PostgreSQL across **10+ reporting tables** to support data-quality checks.
- Participated in sprint ceremonies, backed QA cycles, and resolved **60+ JIRA tickets** related to backend fixes and UI refinements.

Software Developer | Tavant Technologies Pvt. Ltd. | India

December 2021 – July 2023

- Enhanced loan-origination microservices supporting **5K–7K daily underwriting requests** using Java 11, Spring Boot, and Hibernate.
- Restructured MySQL schemas and stored procedures across **20+ core tables**, stabilizing high-volume operations during month-end loads.
- Formulated transaction-safe workflows with retry logic and idempotency controls, preventing **hundreds of duplicate loan events** each release cycle.
- Introduced request throttling, pagination, and optimized API paths that lowered API response time by **150–200 ms** under load.
- Created backend utilities for reconciliation and batch checks covering **50K+ loan records** for daily validation.
- Transitioned select services to containerized deployments on AWS EC2, validating **6+ microservices** against RDS MySQL.
- Coordinated with BA and QA teams to refine API contracts and complex loan rules across **30+ functional scenarios**.
- Documented service flows and integration behaviors across **8+ modules**, helping reduce onboarding time for new engineers.

Software Development Engineer | Trigent Software Pvt. Ltd. | India

January 2021 – December 2021

- Constructed onboarding and profile-management UIs used by **3K+ customers**, improving onboarding speed by several steps.
- Assembled Spring Boot REST APIs handling **2K–3K authentication and KYC requests per day**.
- Organized MongoDB schemas with compound indexes and pipelines that cut analytics query time by **300–400 ms** for dashboard users.
- Connected onboarding screens with backend services through secure Axios + JWT/OAuth flows supporting **1K+ active sessions**.
- Released applications to Azure App Service and automated **10–12 CI/CD pipelines** across dev/UAT stages.
- Set up Azure Monitor alerts and dashboards tracking **25+ API endpoints**, enabling early detection of slowdowns.
- Worked with QA and product teams to validate **40+ UI scenarios** and ensure rule compliance.

PROJECTS

Fairway Broker – Loan Management System

Java, Spring Boot, Hibernate, MySQL, REST APIs

- Delivered a full-stack loan-processing platform with Spring Boot services, optimized SQL queries, and secured REST endpoints for loan intake and approval workflows.
- Refactored data models and improved database indexing in MySQL, reducing query execution time and streamlining access for reporting modules.
- Introduced centralized exception handling, logging, and validation layers, improving error resolution and stability across core service components.
- Engineered administrative features for loan record management, supporting 1,500+ records with consistent performance.

Campus Connect – Academic Workflow Portal

Spring Boot, React.js, PostgreSQL, REST APIs

- Created REST APIs and backend workflows using Spring Boot to support assignments, grade tracking, user authentication, and scheduling.
- Architected frontend dashboards with React.js and Material-UI, improving navigation and usability for students and faculty.
- Established normalized schemas and relational models in PostgreSQL, ensuring reliable data synchronization across all modules.
- Coordinated sprints and deliverables across 6 Agile iterations, resulting in a stable production release for 200+ active users.

TECHNICAL SKILLS

Frameworks & Libraries: React.js, Redux, Tailwind CSS, Bootstrap, Material UI, JSP, Thymeleaf, Figma

Languages: JavaScript (ES6+), TypeScript, Python, Java (Core, J2EE), HTML5, CSS3

Backend & APIs: Spring Boot, Spring Security, Node.js, Express.js, RESTful APIs, JWT, OAuth 2.0, Kafka (event streaming), Axios, Twilio API, Stripe API

Testing & QA: Jest, React Testing Library, Postman, Swagger/OpenAPI, Unit Testing, Integration Testing

Design & Accessibility: Git, GitHub, Bitbucket, GitHub Actions, Docker, Kubernetes (basic), Prometheus, Grafana, Jira, Confluence, Agile (Scrum)
Databases: PostgreSQL, MongoDB, SQL, Spring Data JPA
Cloud & Deployment: AWS (EC2, S3, Parameter Store), CI/CD pipelines, Dockerized Services
Design & Accessibility: Responsive Web Design, CSS Grid, Cross-Browser Compatibility, WCAG Compliance

EDUCATION

St. Francis College NY, USA Master of Science in Information Technology Management	<i>August 2023 – May 2025</i>
Madanapalle Institute of Technology and Science AP, India B. Tech in Mechanical Engineering	<i>August 2016 – May 2021</i>

CERTIFICATION

Oracle Certified Professional: Java SE 11 Developer – Oracle
