

Sravani J
Sr. QA Automation Engineer
Mobile: 4705468416
sravanijammula814@gmail.com

Professional Summary:

- 5 years of experience in the IT industry as **Software Quality Assurance (SQA)** Analyst mainly in Identity management and Security domains.
- Expertise in **Manual** and **Automation testing** of web/ client/server, and standalone applications.
- Extensive knowledge in **Software Development Life Cycle (SDLC)**, **Software Testing Life Cycle (STLC)** and software development methodologies such as Scrum-Agile, Waterfall and Iterative methodologies.
- Proficient on Automation tools like **Selenium WebDriver/IDE/Grid** and **QTP** (Functional & Regression Testing), **Jenkins**, Hudson, Postman, Soap UI for testing Client Server and Web based Applications.
- Expertise in Test Planning, **Test Cases Design**, **Test Environment Setup**, **Test Data Setup**, **Defect Management**, **Configuration Management**.
- Competencies with Test Management and Defect tracking tools like **HP ALM**, **Quality Center**, **JIRA**, and Bugzilla.
- Sound knowledge of **Manual**, **Black Box**, **White Box**, System, Regression, **Integration**, **Functionality**, Security and User Acceptance Testing in testing both client-server and Web-based applications.
- Experience in creating **test plan** and **test strategy**.
- Developed and deployed test Load scripts to do end to end performance testing using Load Runner.
- Extensive experience in preparing documentation on change control, **reporting**, **filling**, tracking, and **managing defects**, and preparing **Traceability Matrix**.
- Hands on experience with Automation Tools: **Selenium** (remote control and **WebDriver**) using JUnit, TestNG and data driven frame works.
- Good Knowledge on **C#** programming language and **C#** object-oriented concepts.
- Good knowledge on Virtualization concepts.
- Experienced in automation testing on Selenium, TFS and Quality Center.
- Good Experience in **Device testing** like **POS**, **Mobile** and Handheld Scanner devices.
- Experience in testing database applications of **RDBMS** in **Oracle**, **My-SQL** and **SQL** Server by executing **SQL Queries**.
- Experience in Test Schedule, Estimation, **Tracking**, **Monitoring and control**, **Risk identification** and **Mitigation**, **Triaging**, Status reporting for Project Stakeholders and Management teams.
- Expertise in **Selenium Automation** using **Selenium WebDriver**, **Selenium IDE**, **Java**, **TestNG**, Cucumber & Maven.
- Experience in testing stand-alone, Client Server, mobile and Web based applications using Automation tools like QTP/UFT.
- Experience in defect life cycle with defining defects, categorizing bugs based on severity and priority, carried out defect reports using different defect tracking tools/excel sheet.
- Business Domain Knowledge on Payments, Credit and Debit card, Health care.
- Expertise in domain technology like Mobile, IT and Financial Industry.
- Proficient with the Microsoft Office suite including Word, **Excel**, **PowerPoint** and **Visio**.
- Excellent team player, ability to meet tight deadlines, and work well under pressure.
- Self-motivated and able to learn new things in a short time span.

Technical Skills:

Automation Tools	Selenium Web Driver 2.x, Selenium Grid, JUnit, TestNG
Test Management Tools	HP Quality Center10.x/11.x, Test director 8.x, JIRA, MTM
Languages	Java, XML, JQuery, AJAX, Unix Shell, PL/SQL
Technologies	Web Services, XPath
Database	MySQL, SQL Server, Oracle

Operating Systems	Windows, UNIX
Tools	Ruby, Ruby Mine, Visual Studio, Firebug, MS-Office, Eclipse, My Eclipse.

Professional Experience

Wintrust Financial, Rosemont, IL
Sr. QA Automation Engineer

Mar' 2024 - Present

Responsibilities:

- Drafted Test Plan which included testing objectives, testing phases, scenarios and test environment after a thorough analysis of the business rules.
- Developed Test Plan with a Test Strategy for the System testing. Instrumental in creating design and frame work for automation.
- Automated **AngularJs4** application module using protractor and created specifications for various functional scenarios.
- Used Jasmine test frame work to write basic tests with an **HTML** test runner that executes test in the browser.
- Developed **Automation framework** using **Selenium**.
- Tested applications developed in Java with **TestNG framework**.
- Used **Selenium WebDriver** for writing test scripts for regression test coverage.
- Developed and executed White box test cases of the **Java API** using **TestNG framework** and **Eclipse**.
- Done the Java coding to automate the migration process and SOAP was used to interact with **Service-Now** platform.
- Implemented, documented and maintained the **Service-Now** platform to meet specific business needs to support ITIL and business processes.
- Worked on creating test case for Object -driven framework for Selenium RC.
- Integrated Automation scripts (Selenium API) on Continuous Integration tool Jenkins for nightly batch run of the Script.
- Automated different Functional Test case using **QTP**, **VBScript**, Check Point, Parameterization and Descriptive Programming.
- Responsible for review and approval of **Validation Documents** including but not limited to **Validation Plan**, Installation Qualification Protocol (IQP), Operational Qualification Protocol (OQP), Performance Qualification Protocol (PQP), Test Plans, Traceability Matrix, Validation Registry Checklist and Validation Summary Report.
- Served as a technical resource for assessing validation requirements, solving test related problems, and developing strategies for problem prevention.
- Performed load tests using **Jmeter** for REST API calls.
- Performed GUI testing to check for appearance of the website.
- Used XPath to work with dynamic and static objects in Selenium.
- Used **SOAP UI** tool to test **SOA** based architecture application to test **SOAP services** and REST API.
- Coordinated with technical support associates to fix proprietary software issues.
- Conducted backend testing using **SQL** queries to validate data for database.
- Attend the BRI (Business Requirement Identification) meeting to understand the business Requirements.
- Developed test scripts to identify the web Elements through locators using **FireBug** and **FirePath** Firefox plugins.
- Verified, edited and update test data in new or existing systems before testing.
- Involved in Understanding user stories in each sprint and creating scenarios in each sprint.
- Used Selenium RC and WebDriver to execute test cases when necessary.
- Providing daily status report to client on day-to-day basis.
- Used Rally to understand the stories and track the hours spent on each task.

Environment: Selenium, Java, TestNG, Jenkins, SOAP UI Pro, Agile, XPath, Quality Center, Eclipse, REST, HTML, CSS, JavaScript, MSWord, MS Excel, PL/SQL, SQL, Windows

Morgan Stanley, New York, NY
QA Analyst/Selenium Tester

Apr' 2022– Feb' 2024

Responsibilities:

- Understand the business requirement and technical specification documents of the system Involved in Agile Scrum meeting and Scrum testing of the system
- Responsible for writing test cases based on the requirements document.
- Analyzed functional requirements and documented the user specifications and business rules. Performed functional testing to identify various critical points in the application and automated it by using Selenium WebDriver.
- Created automation framework using **Selenium WebDriver** and **TestNG**.
- Developed and maintained automated test scripts in Java/JavaScript.
- Performed regression testing on new builds, every modification in the application using Selenium WebDriver.
- Performed Data driven testing using **Selenium WebDriver** and **TestNG** functions which reads data from property and **XML files**.
- Developed Maven based build scripts to run **Selenium Automation**. Integrated Maven Scripts to Continuous Integration Server to run nightly tests.
- Developing **test cases**, **test procedures** and **test data** from requirement document.
- Involved in the validation of equipment and software associated with the Process and Cleaning Validation for manufacture of non-parenteral and automated filling.
- Involved in test plan and test case review meetings
- Updating the test cases document according to review comments
- Used TestNG to create the Test Suites and to execute all the test script
- Performed Smoke, System testing, Integration Testing, Regression testing, User acceptance
- Experience in the development of TestNG framework in Selenium.
- QA Automation with **Java/JavaScript** experience to write automation scripts for selenium using Web driver.

Environment: Selenium Web Driver, IDE, MySQL, Windows, Jenkins, SOAP UI, XPATH, Firebug, XML, HTML, CSS, Eclipse, JIRA, Agile, TestNG, MAVEN, Java, JavaScript

Wells Fargo, New York, NY
QA Engineer

July' 2020 – March' 2022

Responsibilities:

- Reviewed requirement documents and implemented the details to write test plan, **Test scenario**, and test case.
- Managed requirements and maintained test repository using **Quality center (QC)**.
- Created a script using Automation **QTP/UFT** for regression and functional testing.
- Performed Accessibility Testing to check the magnification and reader functionality.
- Performed Automation Testing of each build and then Regression testing on each build using **C#** and **Selenium WebDriver**.
- Performed the maintenance of function and scripts files in **QTP/UFT** for every build and release.
- Performed Manual Testing to assure the design layout and user interface matches the requirement.
- Developed Hybrid automation framework in **C#** by using **Page Objects framework**, **Keyword Driven & Data Driven frameworks**, automated running smoke tests and build report generator for daily builds.
- Performed Load testing using Jmeter.
- Wrote Several **T-SQL scripts (SQL Server)** to validate the data in back end.
- Created Checkpoints and Synchronization points in the application to deal with problems in QTP.
- Used object identification to map and created shared object repository to share all the objects of application globally.
- Enhanced the automation scripts in **QTP/UFT** by using actions and reusable actions.
- Used VB Scripting in **QTP/UFT**, Generated test result using QTP and analyzed actual result and expected result.

- Used "**JIRA**" to manage projects.
- Was actively involved in daily "**Scrum meeting**" and provided status report.

Environment: .NET, Selenium Ide, visual studio, Selenium Web driver, JMeter, Cucumber, QTP, QC, HTML, XML, Jenkins, JIRA, TFS, MS SQL Server, C#, Agile Methodology

Education: Masters from University of Colorado Denver, CO
