SUMMARY

Accomplished Lead .Net Developer with over 12 years of experience specializing in the development, implementation, and maintenance of advanced software systems. Skilled in C, ASP.NET, Entity Framework, and LinQ, with a proven track record of optimizing code quality and system performance, achieving a consistent reduction in bug rates by 40%. Expert in leveraging MS SQL Server for robust database management and Blazor/Angular.js for dynamic frontend interfaces. Adept in cross-functional collaboration, having coordinated development strategies to enhance user satisfaction by 25% across fintech and media sectors.

TECHNICAL SKILLS

- Frontend Development & User Experience: React, Angular.js, Blazor, HTML5, CSS3, JavaScript, UX/UI Design
- Backend Development: C, ASP.NET, .NET Core, Web API, Entity Framework, LINQ
- Database Technologies: MS SQL Server, T-SQL, Oracle, MongoDB, PostgreSQL
- Cloud Infrastructure: Azure, AWS, Docker, Kubernetes
- Version Control, CI/CD & Development Operations: Git, Jenkins, JIRA, TeamCity
- Testing, Quality Assurance & Automation: Selenium, NUnit, Moq, Postman
- Security, Monitoring & Performance Optimization: OAuth, JWT, SonarQube, AppDynamics

PROFESSIONAL EXPERIENCE

Lead .Net Developer

Ideamaker

03/2025-Present

- Spearheaded the development of a comprehensive asset management platform that enhanced operational efficiency by 30%, utilizing C, ASP.NET Core, and Angular.js.
- Led a team of 6 developers in deploying a scalable microservices architecture, reducing deployment times by 50% using Docker and Kubernetes.
- Orchestrated the integration of Azure DevOps in CI/CD workflows, resulting in a 20% increase in deployment frequency and reduced rollback incidents.
- Implemented advanced security protocols using OAuth 2.0 and JWT, which improved application security by 40%.
- Designed and executed automated testing strategies with Jenkins and Selenium, achieving 90% test coverage and reducing post-release defects by 35%.
- Collaborated with cross-functional teams to deliver end-to-end solutions for fintech clients, elevating system reliability and user satisfaction by over 25%.
- Enhanced frontend performance with Blazor, optimizing page load times from 1.5 seconds to 600ms for superior user experience.
- Mentored junior developers to elevate code quality standards and reduce critical production issues by 25%.
- Streamlined SQL Server database queries, increasing query performance by 45% through indexing and query optimization.

Lead .Net Developer

United Airlines

10/2022-03/2025

- Developed integrative features for booking platforms, which improved customer booking efficiency by 25% and supported over 15,000 concurrent users.
- Led the migration of legacy systems to a .NET Core framework, enhancing system performance by 35% and scalability by 50%.
- Utilized Entity Framework to minimize data retrieval time by 20%, optimizing backend processes and improving data access layers.
- Fostered collaboration with QA teams to establish bug tracking mechanisms that reduced bug identification time by 40%.
- Introduced Blazor for SPA development, achieving high-responsive applications that increased user interaction by 30%.
- Championed design reviews that ensured code consistency and reduced code duplication by 50% across multiple development teams.
- Drove agile practices with Scrum, resulting in a 20% improvement in project delivery timeline adherence.
- Coordinated with product management to refine feature sets that align with customer feedback, boosting customer satisfaction scores by 0.5 points.
- Initiated self-service analytics tools via MS SQL Reporting Services, empowering business analysts and increasing data accessibility by 25%.

Senior .Net Developer

Menlo Technologies

07/2017-09/2022

- Developed and optimized large-scale web applications for media clients, supporting over 10 million monthly users with .NET and Angular.
- Achieved a 38% reduction in page response time by implementing efficient caching strategies and CDN integrations.
- Collaborated on a cross-company initiative to implement CI/CD processes, enhancing release cycle efficiency by 35%.
- Architected RESTful APIs that facilitated mobile and web client integrations, expanding feature accessibility to offsite teams and clients.
- Partnered with product managers to develop application roadmaps, driving alignment with business objectives and improving delivery outcomes by 20%.
- Conducted comprehensive code reviews, fostering a culture of quality that resulted in a 30% reduction in code review turnaround times.
- Integrating business rules engines that enabled dynamic control flows, thereby reducing time-to-market for new feature sets by 20%.
- Created data visualization dashboards utilizing Power BI, enhancing real-time business decision-making capabilities by 30%.

Senior .Net Developer

Roche

01/2016-05/2017

- Engineered healthcare compliance software systems that improved regulatory reporting accuracy by 40%.
- Spearheaded optimization efforts for web service endpoints, reducing response times from 2.5 seconds to 750ms using asynchronous programming.
- Fostered enhanced UX/UI designs, increasing user satisfaction metrics by 20% through iterative user feedback loops.
- Collaboratively designed data migration strategies from legacy Oracle databases to MS SQL Server systems, successfully transferring over 1 TB of critical data.

.Net Developer

Netwin Solutions

06/2011-12/2015

- Developed dynamic web-based applications leveraging ASP.NET MVC and C#, substantially boosting client project delivery timelines by 25%.
- Implemented robust ETL processes moving critical data across systems, reducing data inconsistencies by 30%.

- Conducted system analysis and troubleshooting, resolving technical issues and reducing downtime by 15%.
- Facilitated cross-functional meetings to gather requirements, providing clear documentation that increased project clarity and reduced revisions by 20%.

EDUCATION

Bachelor of Science in Computer Science
East Stroudsburg University of Pennsylvania

2010-2014
