(Open to Relocate)

Results-driven **Data Analyst** with 7+ years of experience in AI-driven analytics, **ETL**, automation, and cloud technologies. Skilled in **Python**, **SQL**, **Tableau**, and **Power BI**, with a proven track record of optimizing data pipelines, automating workflows, and enhancing decision-making. Recognized for driving efficiency, cost reduction, and process automation across healthcare, energy, and tech sectors. **Actively seeking opportunities** to lead complex data engineering projects and develop advanced data strategies for impactful solutions.

AWARDS, RECOGNITION, CERTIFICATIONS

- Earned multiple "Shout-out" recognitions and Spot Awards for outstanding performance in optimizing business processes
- Operational Excellence Recognition: Recognized for consistently exceeding performance targets, demonstrating leadership, and driving operational improvements across multiple projects

PROFESSIONAL EXPERIENCE

AAAHC

Data Analyst

Chicago, IL

Jul 2024 - Present

Streamlined Accreditation processes for healthcare units by leveraging data analytics, automation, and AI-powered systems.

Automated reporting tasks using Power BI, and SSIS, managed ETL processes, and delivered insights that empowered the operations and scheduling teams

- Improved accreditation accuracy by 30% by integrating an AI-driven scoring system to validate surveyor inputs against the system-generated recommendation
- Managed and optimized **SQL** Server databases with **500K+** records, ensuring high-performance querying, seamless data retrieval, scalability, security, and reliability
- Developed API-driven data extraction pipelines using **Python** (FastAPI, Flask) to integrate third-party accreditation data with internal reporting systems seamlessly
- Generated 20+ comprehensive **Power BI** dashboards monthly for board meetings, providing insights that facilitated strategic decision-making and compliance monitoring
- Optimized **ETL** workflows by eliminating bottlenecks, leveraging parallel processing and indexing to boost efficiency by **35%**, reducing latency, and enhancing scalability and automation
- Automated 95% of manual reporting tasks using **SSIS**, reducing reporting time by 60% and ensuring real-time data availability
- Enhanced reporting efficiency by 40% by introducing automated data visualization dashboards in Power BI
- Optimized resource scheduling by 15% through data-driven support to the scheduling team
- Provided critical data and insights to 5+ departments, fostering alignment and improving operational outcomes across the organization

ATLAS ENERGY SOLUTIONS

Business Intelligence Engineer

Austin, TX

May 2023 - Dec 2023

Enhanced business applications and documentation using AI, leading to improved efficiency, accuracy, and user experience. Led integration of in-house databases and applications, automating and optimizing daily operations, logistics, and supply chain management

- Integrated Microsoft Copilot within **Power Apps** to provide real-time answers to user queries related to business data, enhancing decision-making and operational efficiency
- Collaborated with cross-functional teams to integrate AI solutions into existing systems, leading to a **40%** increase in process automation and efficiency

- Created data visualization and analysis solutions using **Power BI**, leading to a 25% increase in productivity and a 30% enhancement in service quality. Monitored KPIs with SQL queries and Power BI, reducing operational costs by 30%
- Implemented advanced data processing techniques with **sci-kit-learn** to elevate machine learning capabilities, extracting valuable and meaningful insights from diverse and complex datasets
- Established and maintained **SQL**-based ETL processes using **Azure Data Factory (ADF)** and **Azure Data Lake Storage (ADLS)**, resulting in a 25% reduction in data processing time
- Built **CI/CD pipelines** for automated testing and deployment of BI solutions, improving deployment efficiency and reducing errors. Applied source control practices using **GIT** within **Azure DevOps** to enhance code integrity

EVELYN LEARNING SYSTEMS

Noida, India

Business Intelligence Engineer

Apr 2020 – Mar 2022

Utilized diverse BI tools to prototype solutions, enhancing team efficiency and decision-making capabilities. Conducted rigorous analyses of workflows, driving operational improvements and cost reductions

- Streamlined and automated critical business reporting in **Tableau**, saving 10 hours per week
- Designed and implemented ETL processes using **SSIS** with heterogeneous data sources, empowering teams to optimize reporting and improve accuracy by 25%
- Optimized and deployed 150+ dashboards, reports, and **KPIs** using **Tableau** and **SSRS**, reducing load times by 40% and driving strategic decision-making
- Managed analytic projects with **95%** on-time delivery, ensuring adherence to timelines and quality standards
- Conducted workflow analyses and process improvements, enhancing efficiency by 15% and reducing operational costs by 10%
- Maintained and enhanced ETL pipelines and data warehouses, reducing downtime by 20% and improving analytics efficiency

ACADECRAFT PRIVATE LIMITED

Noida, India

Business Intelligence Engineer

Dec 2018 – Mar 2020

Delivered actionable insights fostering strategic decision-making and continuous improvement. Collaborate cross-functionally to drive transformative projects, ensuring alignment with organizational objectives and enhancing student outcomes

- Generated reports and built dashboards using **SSRS**, **Tableau**, and **Excel**, leveraging advanced features to improve data accuracy by 20% and reduce reporting time by 15%.
- Spearheaded the transition to a data warehouse, improving data accessibility by 30%, storage efficiency by 40%, and query performance by 50%.
- Designed data models and **ERDs**, improving data quality by 15%, reducing redundancies by 30%, and ensuring data integrity through validation procedures.
- Implemented data warehouse architecture, increasing storage efficiency by 40% and query performance by 50%.
- Integrated agile practices into project management, improving customer satisfaction by 15%

SKILLS

- **Programming Languages:** Python (Numpy, Pandas, Matplotlib), SQL, R, HTML, C++, M Query, DAX
- **Databases:** MySQL, MS Access, ETL, SSIS, SSAS, SSRS, Hadoop, Hive, Spark, Azure Data Studio, Visual Studio, AWS, GCP, ADF
- **Tools:** Power BI, Tableau Desktop, Tableau Server, Google Analytics, MS Office (MS Excel, Word, PowerPoint), Power Automate, Power Apps, Azure Logic Apps, Pivot Table, Visio
- **Analytical Skills:** Data Manipulation Using R/Python, Data Mining, Pipelines for Data Processing, A/B Testing
- **Modeling techniques:** Regression, Classification, Clustering, Predictive Modeling, Statistical Analysis, t-test, Hypothesis Testing, Quantitative Attribution Methods, chi-squared test

EDUCATION

UNIVERSITY OF TEXAS

Dallas, TX

M.S. Information Technology and Management

May 2022 - May 2024

RAJIV GANDHI TECHNICAL UNIVERSITY, India
Bachelor of Engineering

Jun 2013 - Jun 2017
