Work Experience

Senior Software Engineer / UI Lead – Visible Activation Team

Verizon Communications, Inc.

06/2022 – Present

Alpharetta, GA

- Lead web development for the Activation team, enhancing the user onboarding experience for pSIM and eSIM products with features such as:
 - Transfer eligibility checker for seamless carrier transitions.
 - eSIM activation via QR code for a streamlined user experience.
 - Self-service port-in request and tracker for efficient request management.
 - SIM central for centralized, intuitive activation instructions.
 - Apple Watch pairing capability to improve user convenience.
- Mentor and guide junior and senior frontend engineers, ensuring:
 - Tasks align with business requirements and deadlines.
 - High-quality, maintainable code through thorough code reviews.

Technologies Used: ReactJS, TypeScript, Next.js, Redux, Node.js, Salesforce, AWS, Kubernetes, Docker, Terraform, GitHub Actions, Cypress, Splunk

Senior Software Engineer

Macy's Systems & Technology Inc.

09/2020 – 01/2022

Johns Creek, GA

- Developed and maintained backend APIs and frontend UIs for the Markdown and Rapid Return projects on the Honeywell CT-40 device, enhancing in-store operations.
- Implemented scan and print functionality for Macy's Inc. brands (Macy's, Macy's Backstage, Bloomingdale's, Bloomingdale's Outlet) to improve operational speed and efficiency.
- Built GCP schedulers and dataflow pipelines for big data processing, ensuring automated jobs execute daily for seamless data reporting.
- Provided technical guidance and conducted code reviews to uphold coding standards.

Technologies Used: Java, Spring Boot, ReactJS, Redux, GraphQL, GCP (Cloud Run, Dataflow, Pub/Sub, BigQuery), Kubernetes, Terraform, Jenkins, PostgreSQL, Firebase, Jest, Cypress

Full Stack Engineer

TSYS

01/2015 – 09/2020

Alpharetta, GA

- Designed, developed, and maintained Spring Boot applications deployed on AWS Cloud, ensuring scalability and reliability.

- Developed an enterprise central configuration manager to streamline configuration management across TSYS applications.
- Built microservices focused on user authentication, enhancing security and accessibility.
- Utilized ReactJS with Redux to develop and maintain frontend applications, ensuring optimized state management and performance.
- Developed and maintained commercial mobile applications using React Native with Redux for cross-platform functionality.
- Led the development of an automation testing framework using Protractor, integrating data virtualization techniques for efficient testing.

Technologies Used: Java, JavaScript, React.js, React Native, Redux, Spring Boot, Node.js, AWS (Lambda, S3, DynamoDB, EC2, RDS), Kubernetes, Docker, PostgreSQL, MySQL, Jenkins, Git, Jira, Jest

Education

Georgia Gwinnett College

Bachelor's Degree in Information Technology – Software Development
2010 – 2014

Skills

Hard skills

- Languages & Frameworks: Java, JavaScript, TypeScript, Python, React.js, React Native, Redux, Next.js, Angular, Node.js, Express.js, Spring Boot, GraphQL
- Cloud & DevOps: GCP, AWS, Kubernetes, Docker, Terraform, Cloud Functions, Cloud Run, Jenkins, GitHub Actions, CI/CD Pipelines
- Databases: PostgreSQL, MySQL, Oracle, MongoDB, Firebase, DynamoDB
- Testing & Tools: JUnit, Jest, Cypress, Selenium, Protractor, Postman, Data Virtualization, Swagger, Splunk
- Collaboration & Agile: Scrum, Kanban, Jira, Confluence, Git, Bitbucket

Soft Skills

- Leadership & Mentorship
- Problem-Solving & Critical Thinking
- Agile & Scrum Methodologies
- Team Collaboration & Communication
- Code Quality & Best Practices
