
AYOKUNLE ADE-AINA

Austin, TX 78753 | 6466438059 | ayokunle.adeaina@gmail.com | <https://www.linkedin.com/in/aadeaina>

Summary

Highly motivated Software Engineer with proven ability to identify, evaluate, and solve problems to optimize IT processes and increase customer satisfaction. Adept at prioritizing tasks and collaborating with cross-functional teams. Skilled in communicating technical information in an easily understandable manner.

Skills

- Cloud Computing (AWS, Azure)
 - Programming (Python, C, C++ Bash, NodeJS)
 - Database: SQL, Mongo, Redis, ServiceNow
 - Cloud: AWS, Azure (Computer, Network, Storage, Database)
 - Infrastructure as Code (IaC) Tools - [Terraform/TOFU, Ansible, Docker, Kubernetes]
 - Project Management: Agile/Scrum/Kanban
-

Experience

Senior Backend Software Engineer SeekOps Inc	03/2022 to Current Austin, TX
---	--

- Collaborated with project managers, developers, QA, and customers to provide OpenAPI Spec based REST API documentation
- Utilized Python, Azure, GitHub, Django Rest Framework, Prefect, Celery, Docker, and Kubernetes to run test scenarios and address data analysis and development issues
- Led software development as the subject matter expert, ensuring customer data protection through Django-Android end-to-end encryption and decryption of customer inspection data
- Worked with UX and UI developers to create Django REST API endpoints for managing file uploads and downloads for various complex scenarios.
- Worked on development of NodeJS Type scripted API endpoints For Drone Service Partner Portal Development.
- Developed, used and maintained Several SQL Tables in Azure PostgresQL, directly and through different ORM.
- Participated in Agile sprint planning, code reviews, and continuous integration processes.

Software Engineer Lumen Technologies	08/2020 to 02/2022 Broomfield, CO
---	--

- Developed IAP workflows for Lumen Technologies RTS microservices, including plug N play product, managed products, and voice products using NodeJS and type script technology stack.
- Leveraged Django REST Framework to create API end points for templifier app for network activations team
- Designed and developed React (NodeJS ,Typescript,Django)components for Templifier2 App to facilitate Lumen Technologies' network activation
- Created Dash-Plotly based order analytics and intelligence tools dashboard PoC for order analytics.
- Participated in Agile sprint planning, code reviews, and continuous integration processes.

Senior Network Software Engineer Dell Inc	08/2016 to 10/2019 Santa Clara, CA
--	---

- Leveraged C, C++ and Python skills to contribute to the development of zero-touch deployment feature support for Networking Operating System on Linux platform

- Implemented privilege level CLI access and full-stack (CLI and backend) AAA TACACS and AAA RADIUS VRF-LITE features for Networking Operating System
- Developed REST interface support for configuring and accessing Netconf protocol through a reverse proxy restful interface.
- Participated in Agile sprint planning, code reviews, and continuous integration processes.

Education and Training

Master of Science: Computer Engineering	05/2016
Florida Institute Of Technology	Melbourne, FL
Bachelor of Science: Electrical, Electronics Engineering Technologies	08/2012
University Of Ilorin	Ilorin, Kwara State, Nigeria

Personal Information

Title: Software Engineer

Certifications

- Azure Foundation Course Az-900
