Professional Profile

Summary

Collaborative management consultant with a record of leading cross-functional teams to deliver innovative solutions. Adept at building strong relationships with clients and stakeholders to drive project success. A strategic problem solver who envisions smart solutions and employs a disciplined execution approach when implementing enterprise-wide initiatives. Outstanding communication skills coupled with exceptional content development prowess with a discerning eye towards detail, clarity, and usefulness. Well-versed in helping clients to develop change management strategies using a combination of macro-level organizational change processes and Prosci's model using the ADKAR framework that focuses on stakeholder engagement, adoption management, and performance measurement.

Areas of Expertise

- Go-to-market Planning, Development and Value Propositions
- Change Management
- Strategic and Tactical Business Planning
- Implementation Leadership
- Risk Assessment and Mitigation Tactics
- Business Process / Operational Re-engineering
- Communications (Executive to end-user)
- Training Strategies & Deployment
- Business Modeling & Analysis
- Collaboration & Partnering

Notable Achievements

- Established a Change Management model for a \$20 billion pharmaceutical company setting the strategy, budgeting, and resourcing for on-demand project fulfillment
- Headed a program-level Change Management team for a pharmaceutical company's largest IT integration initiative in clinical trial management and portfolio operations areas
- Developed and implemented a global communications strategy and template for a \$27.5 billion Medical Technology division of a pharmaceutical company supporting Supply Chain operations transformation to SAP S4/HANA
- Originated value proposition marketing strategies and communications for sales professionals in the Banking and Financial Services sectors
- Implemented a Change Management strategy for an ERP integration (\$18 million project) for a \$200 billion global asset management company including stakeholder readiness assessments, communications, and training, impacting 1000+ accountants and corporate real estate professionals

- Integrated a \$22 billion Personal and Institutional Trust business into a new investment platform for a \$2.2 trillion financial services firm
- Guided technical and business teams to implement a \$750,000 software solution for 14,000+ Wealth Management professionals
- Developed the strategic vision and program plan for a financial pricing transformation impacting 1.3 million banking and financial services clients
- Identified and mitigated risk associated with a manually operated compensation program (\$12M budget) using Six Sigma methods and tactics

- PriceMetrix by McKinsey (2016)

● Bank of America, Merrill Lynch Wealth Management

Director, Business Solutions (2006-2015)

Vice President, Business Intelligence & Analytics (1990-2005)

Change Management Highlights

- Change Management experience in ERP systems (SAP S/4HANA, Anaplan, Veeva, Yardi, ARIBA), Software Development Life Cycle (SDLC), Salesforce (CRM), Purchase Requisition/Purchase Order (PR/PO), procurement management processes, within Waterfall and Agile development cycles.
- Established a Change Management service model for a \$20 billion pharmaceutical company. The model included: project branding, standardizing approaches for stakeholder analysis and engagement activities, change impact analysis, heat maps, user persona packets (leveraging heat maps and impact analysis), communication templates and sequencing, training oversight, supplemental training aides (QRCs). Equally adept at developing and delivering each of these tools.
- Headed a program-level Change Management team for an IT integration program in the clinical trial management and portfolio operation areas. A strategic role ensuring that all firm-wide initiatives were kept abreast of the program's status, deliverables, and timing for cohesiveness and adherence to the enterprise-wide strategy. Oversight of 5 Change leads providing strategic advice, guidance, and adherence to the Change Management model.
- Demonstrated adoption and engagement metrics using a plethora of user engagement strategies resulting in the following:

- User engagement rate of approximately 70%
 - Faster adoption of new tools (100% adoption within 1 month of deployment)
- Introduced change leadership methodology, demonstrating the benefits of this discipline through tactical practices like project branding for visibility, standardizing templates, conducting stakeholder analysis and mapping, and the Organizational Change Management (OCM) plan for guiding stakeholders and mitigating associated risks to end-users for a large, process reengineering initiative
- Spearheaded a combined OCM strategy using a macro-level approach emphasizing the vision, urgency, and reinforcement strategies and Prosci's ADKAR methodology, to identify and mitigate stakeholder barriers to adoption. Change impact analysis assessed the severity of the impact to stakeholders and end-users, heat maps confirmed it, and role-based persona packets were created to summarize the change severity with recommended communication and training needs identified.
- Oversaw the Change Management delivery for a financial convergence effort migrating budget, fund & accrual (manually performed) management processes to automated future state processes for ~150 accountants
- Developed stakeholder engagement plans using various methods such as change impact workshops, information sessions and website messaging. This was coupled with other engagement tactics (e.g., built, coached, and mentored change networks, office hour calls) provided the appropriate forums and tools for ensuring stakeholders and leadership support and buy-in.
- Built and executed a change readiness strategy which ensured end-user acceptance using methods such as surveying end-users at key intervals, creating a robust, communication plan, developing the training strategy and longevity plan for implementing an ERP system impacting 1000+ accountants and corporate real estate professionals
- Provided guidance, coaching and periodic change readiness reviews to senior executive sponsors and executive management to facilitate the successful transformation to Yardi Voyager
- Influenced executive management, legal, risk and compliance partners to endorse a change in strategic direction for a Wealth Management organization using stakeholder and business impact analysis tools
- Developed and implemented a multi-faceted financial pricing transformation strategy targeting 2,400 sales and investment professionals by conducting change impact workshops, using impact analysis tools, assessing change readiness, and customizing communication plans

Learning / Training Highlights

- Developed, implemented and oversaw a \$500 million SAP S/4HANA global training program which used Instructor-Led (ILTs), virtual Instructor-Led (vILTs), and Web-Based (WBTs) training modalities as its primary focus.

- Directed the logistical planning for ILTs and vILTs which entailed: developing a multi-shift training schedule, developing and conducting train-the-trainer workshops, establishing tracking metrics procedures, overseeing regional communication strategies and managing regional training teams ensuring milestones were met
- Leveraged change management tactics and output in developing training strategy, approaches and needs for impacted stakeholders; Similar method was used for developing the training communication plan
- Managed the training content development and delivery, ensuring that training content was loaded to Enable Now and Spectrum training platforms for end-user enablement in advance of initiative deployment.
- Established a continuous improvement process which gathered feedback assessing the effectiveness of workshops and training modules and resulted in metric-driven improvement recommendations

Communications Highlights

- Directed all communication efforts, planning through delivery of a clinical trial management initiative ensuring effectiveness, timeliness, and appropriateness. All modalities were used to increase visibility including social media, face-to-face venues, digital channels, and videos.
- Demonstrated engagement metrics using creative communication strategies resulting in the following:
 - User engagement rate of approximately 70%
 - Email open rate of 95%
 - Internal social media viewing averaging 72%
- Developed customized go-to-market strategies using value propositions to differentiate current products in the market, driving demand and excitement in the financial services industry
- Created a multi-faceted product/initiative positioning framework that had clear messaging with built-in flexibility for Wealth Management sales professionals and stakeholders to embrace

Project Management Highlights

- Built and executed the change management project plan, forecasting resource needs and communicating program status, performance, milestones, dependencies, and issues to senior leadership stakeholders on a software platform initiative centralizing data for financial and property management information impacting 1000+ corporate real estate professionals
- Managed day-to-day work-plan activities and directed business unit-designated change resources to stay on plan. Provided analytics on change management status for management consideration.
- Project managed all phases of a financial product technology initiative (using JIRA) implementing financial pricing software, reporting capabilities, and methodology changes for financial advisors to transition to an innovative technology platform
- Led the planning, development, and delivery of a large-scale marketing, sales engagement, training program and communication plan for a highly visible firm initiative impacting 1.3 million financial services clients
- Directed the technology development for integrating a \$22 billion Trust business into a new investment platform which required milestone development and tracking, weekly status reporting, and monthly report-outs to key stakeholders
- Managed resource planning and mobilization for a centralized Business Intelligence service model ensuring seamless execution of Banking strategic initiatives
- Conceptualized and guided the development of an online sales tool which identified additional opportunities from within a Wealth Management sales professionals' existing book of clients

Risk Management / Mitigation Highlights

- Identified Wealth Management clients at risk of leaving by leveraging surveys, targeted focus groups and interviews to mitigate or address concerns ahead of deploying a new financial pricing model
- Identified and mitigated risk associated with a manually operated compensation program (\$12M budget) for a large bank, using Six Sigma methodologies and tactics
- Guided legal, risk and regulatory partners within Wealth Management, in understanding the impact of altering financial statement language alleviating business risk concerns - various techniques were used to influence outcomes (e.g., business impact analysis, user feedback, data-driven analysis identifying barriers to change)
- Mitigated reputational risk by identifying and analyzing factors of success and leveraging Six Sigma tactics to develop recommendations for promoting a diverse sales professional workforce

Process Improvement Highlights

- Architected and implemented a sales propensity segmentation model which identified additional banking business opportunities for 100+ banking sales professionals
- Standardized and implemented Wealth Management regional team effectiveness strategies by facilitating Myers-Briggs-like workshops and ongoing team assessments while providing tactical recommendations for team cohesiveness and improvement

- Realized annual savings of \$13 million by identifying gaps and inefficiencies in policies and procedures resulting in a redesigned corporate relocation policy and expense collection process within the Wealth Management business

Education & Certifications

B.A. in Economics - Rutgers University
