Professional summary

A results-driven **Techno-Functional Role** with over **18 years of expertise** in designing, developing, and integrating diverse IT solutions across **Banking, Manufacturing, Textile, and Technology** industries. Adept at bridging the gap between business requirements and technical solutions, ensuring seamless implementation and operational excellence. Passionate about embracing challenges, learning rapidly, and thriving under high-pressure deadlines. Recognized for exceptional analytical abilities, strategic technology implementation, and a relentless drive for excellence. A dependable team player with extensive troubleshooting, debugging, and problem-solving experience.

Core Competencies

- **Extensive Industry Experience:** Proven track record across multiple industries, successfully managing project execution from **Developer to Manager Roles** and driving IT initiatives to success.
- **Techno-Functional Leadership:** A strategic leader with a **blend of technical expertise and business acumen**, introducing **innovative solutions** to improve systems, processes, and methodologies.
- **Enterprise Application & Middleware Expertise:** Hands-on experience with **IBM Integration Bus/App Connect, MuleSoft, AS/400, Java, Spring Boot, Micro-services, Apigee**, and other enterprise technologies. Skilled in integrating complex systems and developing scalable middleware solutions, Monitor and resolve Integration API(s) issues coordination with all tech team.
- **ERP System Knowledge:** Extensive experience with **ACCPAC, BPCS, and DataTex ERP systems**, leveraging them to optimize business processes and streamline integrations, server maintenance, environment monitor, software patches
- **Cloud & API Management:** AWS Cloud Practitioner Certified with **strong expertise in IBM API Connect, Apigee**, and cloud-based solutions for seamless service optimization.
- **Project & Resource Management:** Over **three years of experience as a Manager of Consulting Delivery (MCD)**, overseeing IT staff and resources to align with business plans. Expertise in managing **project scope, schedules, budgets, and SLAs** for operational excellence.
- **Process Optimization & Continuous Improvement:** Focused on evaluating post-project performance, identifying key takeaways, and implementing lessons learned to enhance future initiatives.
- **Cross-Functional Collaboration & Stakeholder Engagement:** Strong communicator adept at collaborating with **business stakeholders, IT teams** to deliver high-impact solutions aligned with business goals.
- **Team Leadership & Development:** Passionate about mentoring and developing high-performance teams through **structured training programs**, fostering professional growth, and ensuring project success under tight deadlines.

Various Project Assignment Details

CGI Technology & Solutions Inc, USA as **Senior Consultant / MCD** **March 2015 - till date**
Project Experience – PNC Bank, Pittsburgh, PA

Client: PNC Bank through CGI

Project Focus: Enhancements as per business demand, Technology Up gradation, Migration, and Support for "Change the Bank" and "Run the Bank" initiatives within the Banking Industry.

- **Technology Migration & Up gradation:**
Led the migration of **IBM WebSphere Enterprise Bus** to **IBM Integration Bus (IIB)**, **Mulesoft** ensuring smoother integration and improved system performance.
Spearheaded the conversion of technology from **IBM API services** to **Java Spring Boot Micro-services**, enhancing scalability, performance and application health monitor

Skill Set:

- ✓ **Programming Languages:** Java, Spring Boot, Micro-services, ESQLE, DataWeave RPGILE, VB
- ✓ **Databases & RDBMS:** DB2/400, MS-SQL
- ✓ **Middleware Technologies:** IBM Integration Bus, MuleSoft, IBM WebSphere MQ 7.0.x, z/OS Connect, Apigee
- ✓ **SOA & Web Service Tools:** IIB 9.0/10/11, App Connect, Apigee, Postman, SOAPUI, Anypoint Studio
- ✓ **Project Lifecycle Methodologies:** Agile, SAFe Agile, Waterfall
- ✓ **Version Control:** GIT-BitBucket, SVN
- ✓ **ERP Systems:** ACCPAC, BPCS, DataTex

Training/Certifications:

- ✓ Certified in - ITIL® V3 in Foundation for service Management.
 - ✓ Certified in -  MuleSoft Developer 1
 - ✓ Certified in -  AWS Cloud Practitioner
 - ✓ Certified in -  SAFe® 6 Product Owner/Product Manager
 - ✓ WebSphere Application server 6.1 & IBM Technology for Java VM on i5/OS V5R4 performance workshop
 - ✓ IBM WebSphere MQ
 - ✓ IBM API Connect 5.0.8
 - ✓ Apigee Training from Apigee development
 - ✓ PEGA 8.4 Training from Pega Development Team
- Awards:**
- ✓ 2 times best performer award in Scotia Bank
 - ✓ Best Performer award at Atlas Copco

- **Production Support & Troubleshooting:**
Provided continuous support for **Integration API, Java APIs** in production under the **Run the Bank** framework, ensuring optimal performance and quick issue resolution. Conducted root cause analysis (RCA) for production incidents, collaborating with cross-functional teams to implement solutions and recommendations. Monitoring the applications from the log and resolve the integration issues.
- **Application Design & Development:**
Designed and developed secure, high-performance, and reusable applications using **Java Spring Boot Micro-services**, ensuring scalability and maintainability. Contributed to the preparation of design documents for services and performed architectural analysis of **SOA** services to ensure efficient system integration.
- **Collaboration & Trend Analysis:**
Collaborated with the **Run the Bank** team to perform trend analysis on recurring problems, identifying root causes and proposing solutions for system improvements. Engaged in proactive problem management, continuously enhancing the change process to address issues and mitigate risks effectively.
- **System Maintenance & Upgrades:**
Managed vulnerability assessments (Vulns), version upgrades, and deployment activities across all environments to ensure systems remain secure and up to date.
- **Agile & Process Improvement:**
Implemented best practices within an **Agile** methodology framework, optimizing workflow and team collaboration. Actively participated in **daily stand-ups**, architecture change meetings, and team meetings to track progress, resolve technical challenges, and ensure project deadlines are met.
- **Additional Responsibilities:**
Contributed to **status reporting, estimation support** for architects, and **knowledge transfer** initiatives. Played a key role in resolving technical issues while ensuring timely delivery and meeting project deadlines.

Environment: Java, Spring Boot Micro-services, Apigee, MuleSoft, IBM Integration Bus, Z/OS Connect, Postman, SoapUI, uDeploy, Jenkins, Git-Bitbucket

Mastech Resource Inc, USA as Senior Consultant June 2014–March 2015

Project Experience – PNC Bank, Pittsburgh, PA

Client: PNC Bank through Mastech contracting to CGI

Project Focus: Enhancements as per business demand, Technology Up gradation, Migration, and Support for "Change the Bank" and "Run the Bank" initiatives within the Banking Industry.

- **Technology Migration & Up gradation:**
Led the migration from **IBM WebSphere Enterprise Bus** to **IBM Integration Bus (IIB)**, **Mulesoft** optimizing integration capabilities and enhancing system performance.
- **Production Support & Integration Services:**
Provided ongoing support for **Integration Services** in production, managing incidents and issues under the **Run the Bank** framework to ensure high availability and minimal downtime.
- **Application Design & Development:**
Designed and developed secure, high-performance, and reusable integration services using **IBM Integration Bus** to enable seamless communication across banking applications.
- **Service Design & Architecture Analysis:**
Contributed to preparing design documents for integration services and conducted thorough analysis of **SOA** service architecture to ensure optimal performance and scalability.
- **Root Cause Analysis & Problem Management:**
Collaborated with the **Run the Bank** team to analyze trends, perform root cause analysis (RCA), and identify effective solutions and recommendations to address recurring issues and improve system reliability.
- **Incident & Change Management:**
Conducted analysis of incidents, events, and change data, identifying root causes and implementing corrective actions to maintain smooth operations. Focused on continuous improvement of the change process and problem management to enhance service delivery.

Education:

- ✓ Master of Science (Information Technology) – 2005, Mysore, Karnataka-India
- ✓ Bachelor of Science (Electronics) – 1998, Shimoga, Karnataka-India
- ✓ Advance Diploma in Software Engineer -1999, Aptech – Davangere, Karnataka-India

Employer:

- ✓ CGI Inc, USA, - Mar 2015 to till date
- ✓ Mastech Digital Inc, USA – June 2014 to March 2015
- ✓ IBM India Pvt. Ltd, Bangalore – Dec 2007 to June 2014
- ✓ Infinite Computer Solutions Pvt. Ltd, Bangalore – Jan 2005 to Dec 2007

- **Agile & Best Practices Implementation:**

Participated in daily **stand-up meetings**, **architecture change meetings**, and **team meetings** to discuss progress, technical challenges, and proposed solutions.

Ensured the implementation of **best practices** to improve efficiency and consistency across projects.

- **Reporting & Knowledge Transfer:**

Managed **status reporting**, facilitated **knowledge transfer** sessions, and provided technical guidance to meet deadlines while resolving technical issues promptly.

Environment: IBM WebSphere Enterprise Bus, IBM Integration Bus, IBM API Connect, SoapUI, uDeploy, SVN

IBM India Pvt Ltd, Bangalore/USA

as Application Lead

Dec 2007–June 2014

Project Experience – Atlas Copco, Rock Hill, SC

Duration: Dec 2011 – June 2014

Client Industry: Banking, Automobile, and Manufacturing

As an **Application Lead**, I was responsible for developing, supporting, and enhancing the **BPCS ERP Application** running on **AS/400** technologies, utilizing **RPGILE/CLLE**, **DB2**, and **IBM Integration Bus**.

- **SOA Service Design & Integration:**

Led the design and development of **SOA services** to integrate various new and existing systems, ensuring seamless communication between applications and improving system functionality.

- **Production Support & Issue Resolution:**

Provided ongoing support for the **BPCS ERP Application**, managing daily tickets, troubleshooting issues, and delivering permanent fixes for the **production environment** to maintain system stability.

- **Integration Requirements Analysis:**

Worked closely with business and system resources to identify and define integration requirements, ensuring alignment with business needs and technical capabilities.

- **Team Collaboration & Coordination:**

Coordinated activities with the on-site team to deliver high-quality solutions that met client specifications and requirements, ensuring efficient project execution.

- **Collaboration with SOA Architects:**

Collaborated closely with **SOA Architects** in the design and implementation of enterprise-level services, ensuring scalability, reliability, and performance across systems.

Environment: IBM Integration Bus, WESB, SOAPUI, RPGILE, CL/400, SQL/400, DB2

Project Experience – Manheim, Atlanta, GA

Duration: June 2010 – Dec 2011

Client Industry: Auto Auction Services

As a **Team Member**, I was responsible for developing and supporting the **BPCS ERP Application** used for auto auction services, running on **AS/400** with **RPGILE/CLLE**, **DB2**, and **IBM ESB**. IBM India and US provided continuous maintenance and support services.

- **Production Support & Issue Resolution:**

Handled day-to-day support tickets, troubleshooting and applying permanent fixes to ensure the smooth functioning of **auction activities**, keeping critical systems running (Keeps Lights On).

- **Service Development & Integration:**

Developed services that integrated with ERP applications, ensuring smooth data exchange and process automation across systems.

- **Service Redesign & Validation:**

Redesigned services as required, working closely with the **SOA team** to validate service design and service contracts, ensuring alignment with business requirements.

- **Team Collaboration & Coordination:**

Coordinated with the onsite team to deliver high-quality solutions that met client requirements and ensured effective project execution.

- **Data Services Planning & Estimation:**

Contributed to **data services planning** and estimation for module implementations, ensuring accurate timelines and resource allocation for projects.

- **L3 Production Support & Deployments:**

Provided **L3 production support** and managed **new production deployments**, ensuring that updates and fixes were seamlessly integrated into the live environment.

Environment: AS/400, IBM WebSphere ESB, Aldon CMS

Project Experience – Scotia Bank AMS, Toronto

Duration: Jan 2008 – June 2010

Client Industry: Banking

As a **Team Member**, I contributed to the development and production support of the **SG Application** for **Scotia Bank**, supporting all Caribbean countries for over 10 years. The project involved high-end technologies, with IBM managing major development, production support, and testing activities.

- **Requirements Analysis & Design:**
Participated in **high-level and low-level design** and analysis, ensuring that project deliverables met business needs and technical specifications.
- **SOA Standards Compliance:**
Audited project quality to ensure adherence to **SOA application standards**, ensuring consistency and best practices across all initiatives.
- **Technical Specifications & Service Development:**
Analyzed functional specifications and developed the technical specs for various projects, leading to the development of services using **RPGILE, CLLE, and VB**.
- **Documentation & Approach Planning:**
Prepared **approach documents** for **PLogs** and contributed to project documentation, ensuring all steps were well-documented and aligned with IBM's methodologies.
- **Quality Methodology & Controls:**
Involved in **IBM's quality work methodologies**, including **BCP, DPS, project documentation**, and **quarterly controls**, ensuring project quality was maintained throughout the lifecycle.
- **Incident & Change Management:**
Addressed issues through **incident and problem management** processes and actively participated in **change management activities** during weekends, ensuring smooth system updates and transitions.

Environment: AS/400, RPGILE, CLLE, SQL, DB2, WESB

Infinite Computer Solutions Pvt Ltd., Bangalore

as Consultant ERP Practices

Jan 2005–Dec 2007

Project Experience – ERP Practices Consultant for Textile Industry

Client Industry: Textile

As a **Consultant** for ERP practices, I served the **Textile Industry** by supporting the **Datatex T.I.M. ERP application**, which runs on **IBM AS/400** and **iSeries computers**. The system is primarily written in **RPG** with additional support modules developed in Java. I was responsible for developing custom **add-on modules** integrated with **T.I.M.**, catering to Indian customers and organizations utilizing the system across India.

- **Application Maintenance & Support:**
Provided **ongoing application maintenance and support**, ensuring system uptime and addressing technical issues promptly for the **T.I.M. ERP application** and its modules.
- **Module Integration & Development:**
Developed integration modules for **Sales, Production, Inventory, Purchase Orders, Costing, and Resource Planning**, enabling seamless data flow and process automation across systems.
- **Customization for India-Specific Business Needs:**
Developed **customized modules** tailored to Indian business practices, including **Financial, HR & Payroll, Plant Maintenance**, and **Quality Assurance** processes, ensuring the solution met local requirements.
- **Ad Hoc Tasks & Reporting:**
Led **ad hoc tasks** such as generating **audit reports** and performing **Purchase Order reprocessing**, assisting in regular system operations and business audits.

Environment: AS/400, RPG ILE, CLLE
