

SAISREE RAVURI

Full Stack Developer

Phone: +1(334)6696182

Mail: saisreechowdary970@gmail.com

PROFESSIONAL SUMMARY

- Experienced Frontend Developer with 3 years of expertise in building responsive, high-performance web applications using HTML, CSS, Bootstrap, Angular, PHP, and Java in Linux-based environments.
- I focus on creating user-centric, mobile-responsive designs that ensure seamless experiences across all devices and browsers.
- Skilled in front-end development, I integrate APIs, build dynamic interfaces, and optimize UI components for speed and usability.
- I develop clean, scalable web pages using Angular, HTML, and CSS, following best practices in responsive design and performance optimization.
- Collaborating with backend teams, I use PHP, Java, and SQL to build dynamic, data-driven applications, ensuring efficient data handling and fast queries.
- Proficient in Linux, I utilize command-line tools and shell scripting to streamline development, automate tasks, and manage servers effectively.
- I use GitHub for version control, maintaining clean, organized code and collaborating smoothly within development teams.
- With experience deploying on AWS (EC2, S3, CloudWatch), I build scalable, secure, and highly available applications by following cloud best practices.
- I regularly refactor code and optimize CSS, JavaScript, SQL, and Java-based logic to improve website performance and user experience.
- Currently pursuing a master's in Computer Science, I'm passionate about learning new technologies and building innovative web solutions.

TECHNICAL SKILLS

Languages	JAVA 11/8/7, PHP, Java Script, and PL/SQL
Web Technologies	HTML, XML, CSS, Java Script, Angular JS, Angular 9/8/7, AJAX, JSP, jQuery, DTD, Java Beans, JMS
J2EE Technologies	Servlets, JSP, JSF, Servlets, JMS, JNDI, Web Services, JDBC, SOAP, RMI
Methodology	UML, MVC, Agile, Scrum, Waterfall
App/Web servers	Apache Tomcat, Web logic, Apache Server, JBoss, Kafka, Apache Camel
Applications Frameworks	Spring 4/5, Hibernate, Struts, JSP, Spring Boot, Spring MVC
Web Services	SOAP, WSDL, AXIS, JAX---WS, REST, JSON, JAX---RS
UML tools/ Build tools	Apache ANT, Maven, Jenkins, Azure, Docker, Kubernetes, PCF, CI/CD, Google cloud, JUnit, Jira, Dream viewer, Rational Rose, UML
Databases	Oracle, MySQL, MongoDB
XML	XML, XSLT, JAXB, SAX, DOM
AWS	EC2, RDS, S3, ELB
IDE	Eclipse, My Eclipse, NetBeans, JDeveloper
Operating Systems	Windows, UNIX, LINUX, MacOS.

PROFESSIONAL EXPERIENCE

Client: Role: Full Stack Developer / Tata Consultancy Services, Hyd-India / Duration: Dec 2021- Aug 2023

- Developed clean, scalable, and visually appealing web pages using **HTML, CSS, Angular, and Bootstrap**.
- Applied **mobile-first design** principles to ensure responsive layouts across various screen sizes and devices.
- Built dynamic, interactive user interfaces by integrating **RESTful APIs** and optimizing **UI components** for performance and usability.
- Enhanced user experience by maintaining **responsive layouts** and ensuring smooth **front-end functionality** across all platforms.
- Refactored and optimized front-end code using **JavaScript, CSS, and Angular** to improve speed and maintainability.
- Collaborated with backend developers to integrate **PHP** and **Java** into frontend applications, enabling dynamic, data-driven features.

- Developed and maintained **Java-based** backend services to support business logic and ensure robust application performance.
- Managed and optimized **SQL** databases, improving **query performance** and ensuring efficient data retrieval.
- Built full-stack applications that ensured seamless communication between **frontend** and **backend systems**.
- Utilized **Linux-based environments** for development, deployment, and monitoring of web applications.
- Automated tasks using **shell scripting** and **Linux command-line tools**, streamlining daily workflows and deployment pipelines.
- Handled server configurations and performance tuning to ensure smooth operation in **Linux environments**.
- Used **Git** and **GitHub** for version control and collaborative development.
- Managed branches, pull requests, and code reviews to ensure clean, organized, and maintainable **codebases**.
- Followed **Agile** methodologies, participating in **daily stand-ups**, **sprint planning**, and **team retrospectives** to stay aligned with project goals.
- Deployed web applications on **AWS**, leveraging services such as **EC2** for hosting, **S3** for storage, and **CloudWatch** for performance monitoring.
- Ensured **scalability**, **high availability**, and **security** of applications by implementing **cloud deployment** best practices.
- Maintained and supported **CI/CD pipelines** for smooth, automated deployments and quicker release cycles.
- Collaborated with **cross-functional teams** to meet project deadlines and deliver high-quality features.
- Contributed to a collaborative and transparent team culture by sharing insights and resolving development issues.
- Continuously optimized **CSS**, **JavaScript**, **Java**, and **SQL queries** to improve overall **application performance** and **user experience**.

Environment: HTML, CSS, JavaScript, Angular, AngularJS, Bootstrap, jQuery, AJAX, Java, J2EE, Spring Boot, Spring MVC, PHP, SQL, MongoDB, REST, RESTful APIs, AWS (EC2, S3, CloudWatch), Docker, Jenkins, CI/CD, Git, GitHub, Linux, Shell Scripting, Tomcat, Node.js, XML, Jenkins, Docker.

Client: Role: Front-end Developer / Ramdisk, Hyd-INDIA / Duration: Jul 2020- Nov 2021

- Created **clean, responsive**, and **visually appealing** web pages using **HTML, CSS, Angular**, and **Bootstrap**.
- Ensured **mobile-friendly** designs by applying **mobile-first principles**, delivering a seamless experience across all screen sizes and modern browsers.
- Built **dynamic** and **interactive user interfaces** by integrating **RESTful APIs** to display real-time data.
- Optimized **front-end features** and layouts to maintain consistent performance across devices.
- Collaborated with **backend teams** to ensure proper data integration and functionality on the user interface.
- Integrated **PHP** with the frontend to build **data-driven** web applications and enhance dynamic content delivery.
- Managed and optimized **SQL databases**, improving data **storage, retrieval**, and **query performance**.
- Developed full-stack workflows ensuring seamless communication between **frontend** and **backend systems** for a smooth user experience.
- Worked in **Linux-based environments** for **development, deployment**, and **application monitoring**.
- Automated tasks using **Linux command-line tools** and **shell scripting**, improving operational efficiency.
- Managed application servers, resolving issues to optimize system **performance** and **uptime**.
- Used **Git** and **GitHub** for **version control**, collaborating with team members through branches, pull requests, and code reviews.
- Maintained a **clean, scalable**, and **well-structured codebase** to support future enhancements and integrations.
- Regularly reviewed and refactored code for clarity, performance, and maintainability.
- Deployed web applications on **AWS**, utilizing services such as **EC2** (hosting), **S3** (file storage), and **CloudWatch** (performance monitoring).
- Followed **cloud best practices** to ensure scalability, **security**, and **high availability** of deployed applications.
- Managed and maintained **CI/CD pipelines** for efficient build, testing, and deployment processes.
- Focused on **performance optimization** by refining **CSS, JavaScript**, and **SQL queries** across the stack.
- Monitored application performance and proactively resolved issues to maintain **fast load times** and a **smooth user experience**.
- Actively contributed to an **Agile team**, participating in **daily stand-ups**, **sprint planning**, and **code reviews**.
- Collaborated closely with teammates to meet project deadlines and deliver high-quality features.
- Promoted a **knowledge-sharing culture**, helping improve development processes and team collaboration.

Environment: HTML, CSS, JavaScript, Angular, Bootstrap, jQuery, RESTful APIs, PHP, SQL MySQL, AWS (EC2, S3, CloudWatch), CI/CD, Git, GitHub, Linux, Shell Scripting, Command Line, Agile, Scrum.

Travel Buddy Finder | Major Academic Project | Master's in Computer Science/ Duration: Aug 2024 – Dec 2024

Description:

Developed a **full-stack web platform** that helps travelers connect with like-minded companions based on destination, travel dates, and shared interests. The system supports user profile creation, trip listings, real-time chat, and review functionality to foster a safe and collaborative travel community.

Key Responsibilities:

- Designed and implemented a **responsive user interface** using **HTML, CSS, Bootstrap**, and **Angular** to ensure seamless experience across devices.
- Built RESTful backend services using **PHP** and **MySQL** to manage users, trips, messages, and reviews.
- Developed **user registration, login**, and **profile management** modules with secure authentication and session handling.
- Integrated **search and match algorithms** to filter travel companions based on trip criteria (destination, date, interest).
- Enabled **real-time messaging** between users for travel coordination using in-app communication tools.
- Designed and implemented **user rating and review** systems to build trust among community members.
- Created and normalized the **database schema** (User, Trip, Message, Review) and managed relations using **MySQL**.
- Deployed the platform on a **Linux environment** and used **shell scripting** for automation during testing and deployment.
- Implemented version control using **Git** and **GitHub** for collaborative code management and documentation.

System Features:

- **User Management:** Registration, login, profile editing, and preference setting.
- **Trip Management:** Create, view, and manage trip listings.
- **Search & Match:** Filter users by destination, dates, and interests.
- **Messaging System:** Secure, real-time chat between matched users.
- **Review System:** Rate and review companions' post-trip for safety and credibility.
- **Admin Panel:** Monitor user activity for safety and compliance.

Technologies Used: HTML, CSS, Bootstrap, Angular, Typescript, PHP, MySQL, Postman, Git, GitHub, Linux, Shell Scripting, VS Code, XAMPP, Jenkins.

Challenges Overcome:

- Implemented efficient **real-time messaging** with minimal latency.
- Ensured **data consistency** across users, trips, and chat features.
- Optimized for **cross-device performance** using mobile-first design.
- Maintained **data privacy and security** for user communications and profiles.

Future Enhancements (Planned):

- **Photo ID verification** for safer user onboarding
- **Multi-language and multi-currency support** for global users
- **In-app voice and video calling** for better communication
- **Travel insurance integration** for added traveler safety
